SECTION 1 INTRODUCTION

- 1.1 Monterey-Salinas Transit is requesting proposals from qualified offerors to perform the Measure Q 15-Year Plan (Q-Plan).

1.1.1 Background

Monterey-Salinas Transit is transit district that provides fixed-route, demand-response and special seasonal transit and mobility services to a 280 square-mile area of Monterey County with connections to Santa Cruz County in Watsonville, Aptos, Soquel and downtown Santa Cruz; Santa Clara County in Gilroy, Morgan Hill and San Jose; and San Luis Obispo County at Paso Robles. MST operates fifty-seven routes within a service area comprised of an estimated 352,000 people and has a total of 89 full-size buses in its active fleet, including eight themed trolley-style buses as well as a fleet of approximately 50 minibuses that operate ADA-paratransit as well as selected fixed-route and general public demand response services. It operates through two major transit hubs in Monterey and Salinas as well as secondary hubs in Marina and at the Edgewater Shopping Center in Sand City. Annual boardings on the fixed-route system total 4.3 million (FY 2014) and the annual operating revenue for the system in FY 2014 was \$34.4 million. Of that amount, 48% comes from state/local funds. Federal sources fund 30% of the operating budget. Approximately 20% of the operating budget is generated from fares. The remaining 12 of the operating budget is comprised of other sources.

MST provides a variety of fixed-route services to meet the unique needs of the rural, small and medium-sized communities it serves. High frequency commuter services in Salinas, Monterey and Seaside complement local and neighborhood services in Pacific Grove, Carmel, Marina and Del Rey Oaks. Regional service connects citizens of Monterey County to Watsonville, Carmel Valley and South Monterey County and to a variety of other destinations and attractions. Inter-regional services connect Monterey to Santa Cruz and San Jose and connect Salinas to San Jose, Fort Hunter Liggett and Paso Robles. Fleet-wide, MST has installed the Siemens Transit Master Advanced Communication System technology, which monitors locational and operational data continuously via GPS. Buses are equipped with variable message signs and automated voice announcement technology. The TransitMaster system also allows MST to collect daily time-stamped passenger boarding data on a stop-by-stop basis.

MST is committed to assisting persons with disabilities and other travel challenges in receiving the same level of mobility and travel independence on public transit that other people enjoy. To this end, MST operates several mobility services that provide a variety of travel options that allow travelers to participate fully in their communities. Our mobility services are divided into two major categories: an ADA compliant paratransit program (RIDES) and services

providing travel assistance to those who do not qualify for paratransit service or do not need to use paratransit service for some or all of their trips.

These services are funded partially through customer fares but mostly through grants and allocations from federal, state, and local sources, including public agencies and private foundations. With many of these grant sources being significantly reduced or eliminated, on November 4, 2014, the voters of Monterey County approved, Measure Q – a 1/8-cent sales tax dedicated to transportation services for seniors, veterans and persons with disabilities. With revenues beginning to be collected on April 1, 2015, MST is seeking assistance from a qualified consultant in developing a 15-year expenditure plan and program of projects for Measure Q funds – estimated to generate approximately \$7 million per year.

More information on Measure Q can be found at http://mst.org/news_items/thanks-for-supporting-measure-q/, while more general information about MST's mobility services is detailed on the Mobility page of the MST website (<http://www.mstmobility.org/>), which includes video presentations and testimonials from our valued customers. Additional information about MST's other services and previously completed planning documents (www.mst.org/about-mst/planning-development/) are available through the MST home page (www.mst.org).

SECTION 2 SCOPE OF WORK/SERVICES

2.1 STATEMENT OF SPECIFICATIONS OR SERVICES

2.1.1 Objective

The Q-Plan is designed to accomplish the following:

- Evaluate how well MST's existing Mobility Management services for seniors, veterans and persons with disabilities are meeting passenger demand with regards to operational performance, mobility demands, accountability, functionality, efficiency, cost-effectiveness, safety and convenience;
- Create a public outreach and engagement initiative that informs the community and key stakeholders of the Measure Q planning process and its opportunities to provide input regarding existing and potential mobility programs and services;
- Assess and analyze the input received from the public and key stakeholders regarding current and future mobility needs;
- Develop a 5-year program of projects for near-term implementation and create a system of metrics to prioritize these projects in order of potential performance and cost effectiveness.

- Develop criteria to measure the actual performance of these near-term mobility projects after implementation;
- Develop a 6- to 15-year long-term vision of mobility concepts that would meet emerging and future demands among these targeted Measure Q populations.

2.1.2 Technical Specifications

MST expects that the following tasks will be completed as part of the Q-Plan. These tasks may be restructured in your detailed work plan as long as the detailed work plan will result in achieving the project's objectives. Proposers are expected to expand upon these tasks and provide details as to how each task will be completed.

Most of the data required to complete this task is already available. Data sources include, but are not limited to: Siemens Transitmaster Automated Communications Systems data/reports;

GFI electronic farebox data; National Transit Data Base typical daily ridership information; RIDES Program ridership reports; AMBAG (Association of Monterey Bay Area Governments) Three County Regional Model, US Census data; MST Rider's Guides. 2.1.2.3 Collect Additional Data. If the existing data is not adequate, additional data will be collected in this task. The data that is required should be identified and the method of collection should be discussed.

2.1.2.4 Public Outreach Initiative. This task involves the creation of a public outreach and engagement initiative that informs the community and key stakeholders of the Measure Q planning process and its opportunities to provide input regarding existing and potential mobility programs and services. This public outreach initiative shall include a display advertisement (in English and Spanish), a website, a bilingual mailer targeted to Measure Q populations, powerpoint presentation; on-line survey to assess potential mobility needs; social media campaign; etc. *Direct costs for placing advertising and publicity will be paid by MST and not the consultant.* In addition, the consultant will be responsible for coordinating eight (8) public / stakeholder engagement meetings.

It is envisioned that these performance measures would be reported to the MST Board of Directors and the general public on a quarterly basis.

Deliverable: Performance “dashboard” illustrating these performance evaluation criteria in graphic form (e.g., graphs, tables, charts, etc.)

- 2.1.2.8 Prepare Long-Term Vision Plan. Develop a 6- to 15-year long-term vision of mobility concepts that would meet emerging and future demands among these targeted Measure Q populations. closeout costs, and profit on work performed up to the time of termination. The Contractor shall promptly submit its termination claim to MST.

If it is later determined by MST that the Contractor had an excusable reason for not performing, such as a strike, fire, flood, or events which are not the fault of or are beyond the control of the Contractor, MST, after setting up a new delivery or performance schedule, may allow the Contractor to continue work, or may treat the termination as a termination for convenience.

If the termination is for default, MST may fix the fee to be paid the Contractor in proportion to the value of work performed up to the time of termination. The Contractor shall promptly submit its termination claim to MST and the parties shall negotiate the termination settlement to be paid the Contractor.

- 12.3 Opportunity to Cure. MST, shall, in the case of a termination for breach or default, allow the Contractor up to five (5) calendar days in which to cure the defect. In such case, the notice of termination will state the time period in which cure is permitted and other appropriate conditions.

If Contractor fails to furnish or remedy to MST's satisfaction, the breach or default or any of the terms or conditions of this Contract within five (5) calendar days after receipt by Contractor or written notice from MST setting forth the nature of said breach or default, MST shall have the right to terminate the Contract without any further obligation to Contractor.

Any such termination for default shall not in any way preclude MST from also pursuing all available remedies against Contractor and its sureties for said breach or default.

- 12.4 Waiver of Remedies for any Breach. In the event that MST elects to waive its remedies for any breach by Contractor of any term or condition of this Contract; such waiver by MST shall not limit MST's remedies for any succeeding breach of that or of any other terms or conditions of this Contract.

Upon receipt of any notice from MST to cancel and/or terminate work under this contract, the Contractor shall:

Immediately discontinue all services affected, unless the notice directs otherwise.

If the termination is for the convenience of MST, MST will make an equitable adjustment in the contract price but shall allow no anticipated profit on unperformed services.

If the termination is for failure of the Contractor to fulfill the contract obligations, MST may complete the work required by the contract or otherwise arrange for its completion and the Contractor shall be liable for any reasonable additional cost incurred by MST.

13. DISPUTE RESOLUTION

Disputes arising in the performance of this contract, which are not resolved by agreement of the parties, shall be decided in writing by the MST General Manager/CEO. This decision shall be final and conclusive unless within fourteen (14) calendar days from the date of receipt of its copy, the Contractor mails or otherwise furnishes a written appeal to the MST General Manager/CEO.

The decision of the MST Board of Directors shall be binding upon the Contractor and the Contractor shall abide by the decision.

14. LITIGATION

Recovery of these expenses shall be as additional costs awarded to the prevailing party and shall not require initiation of a separate legal proceeding.

Unless otherwise directed by MST, Contractor shall continue performance under this Contract while matters in dispute are being resolved.

15. LIQUIDATED DAMAGES - DEDUCTIONS FROM UNPAID BILLINGS – REMEDIES FOR NON-PERFORMANCE

Since the actual damages to MST for the delay of work/services and/or failure to perform scope of work duties will be difficult or impossible to assess. It is agreed that if the contract is terminated by MST, because the Contractor fail to deliver and/or perform the services within the time specified in the contract. That the contractor shall be liable for thirty percent (30%) of the total value of the contract as fixed and liquidated damages. The Contractor shall not be charged with liquidated damages when the delay arises out of causes beyond the control and without the fault or negligence of the Contractor.

Prior to the imposition of termination and liquidated damages the Contractor shall meet with MST's Project Manager, to review the contemplated implementation of termination and Liquidated Damage. The Contractor shall be provided with the opportunity to present any mitigating information/evidence to substantiate any claim that the deficiency in performance was beyond the control and/or without fault or negligence of the Contractor. To this end, MST has developed procedures to remove barriers to assist DBEs to develop and compete successfully outside of the DBE program. In connection with the performance of this contract, the Contractor will cooperate with MST in meeting these commitments and objectives.
