1. SUMMARY

A Phase I Environmental Site Assessment (ESA) was performed for four parcels identified as Fort Ord Track Parcels L20.16.1, L20.16.2, L20.16.3, and L2.1 and portions of adjacent parcel E2b.3.2. The main portion of the site is owned by the Transportation Agency of Monterey County and the rest is owned by the City of Marina. The site is located in the former Fort Ord, California (Plate 1). This report was prepared in general accordance with the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-05 and the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law). The property is hereafter referred to as the “subject site”.

The subject site consists of mainly of four parcels over approximately 15 acres. The site is located mostly southwest of the intersection of 8th Street and 1st Avenue in Fort Ord and is currently occupied by the storage for Habitat for Humanity and storage for the Monterey Peninsula College (MPC) Theatre Department. The subject site has a history with activities associated with the Quartermaster’s receiving and storage of food and supplies for the base.

Kleinfelder’s Phase I ESA of the subject site revealed the following RECs associated with the site:

- Based on documented site use (gas station at northwestern end of site), there is the potential for leaked petroleum hydrocarbons to be present in site soils and groundwater in the area of the former gas station. Even though Fort Ord documents indicate that the tanks were removed under guidance of the MCEHD, letters of closure were not available. Based on information provided within the FOST, eleven 12,000-gallon USTs were in operation in the northwest corner of the site, indicated on Plate 2 as “former tank area.” Specifics for each tank are presented in Section 4.5.

- Three rail spurs were reportedly located on the site and, based on observations, remain on the site. Potential contamination associated with railroads includes
petroleum hydrocarbons, polychlorinated biphenyls (PCBs), pesticides, herbicides, polynuclear aromatic hydrocarbons (PAHs), and metals.

- A monitoring well established on the site indicates that there is a potential for impacted groundwater from the OU-2 plume (located to the north and northeast) to migrate beneath the site. In addition, the site is located within a restricted land use zone that prohibits drilling wells for drinking water or landscaping use.

In addition, while not considered to be RECs by definition, the following environmental conditions were revealed that could affect the site:

- A portion of the site is used for vehicle parking and storage. This area has a gravel cover over soil. Kleinfelder assumes that minor leaks have occurred from these parked vehicles, however, these small leaks are likely to be a de minimis condition that does not require additional investigation. In the event that leaks are determined to be significant based on other information, this conclusion should be re-evaluated.

- Paint and coatings that contain lead, such as Lead Based Paint (LBP), and building materials that contain asbestos, such as Asbestos Containing Materials (ACM), Asbestos Containing Building Materials (ACBM), and Asbestos Containing Construction Materials (ACCM), are specifically excluded from ASTM Standard 1527-05 and therefore have not been evaluated in this assessment. However, based on the age of the structures on the site, it is possible that paint and coatings that contain lead and materials that contain asbestos may be present. If structures at the project site are to be demolished or renovated, an asbestos and lead paint survey should be performed in accordance with Federal, State, and local regulations to comply with EPA and OSHA regulations.

Any data gaps, deviations, historical environmental conditions, and de minimis findings are discussed in Section 8 of this report. This report is subject to the limitations in Section 2.5.
2. INTRODUCTION

The following report is a summary of work performed in general accordance with the scope and limitations set forth in the ASTM Standard E-1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard), the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law), and our proposal to Parsons dated April 21, 2009, and revised May 14, 2009. This report also generally conforms to the ASTM Standard’s suggested table of contents. This report is for the property located at 8th Street and 1st Avenue and the adjacent property to the south, located in former Fort Ord, California (together, the “site” or “subject site”).

2.1 PURPOSE

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the scope of work defined in our work order, and the limitations discussed in this report, RECs and other environmental issues related to the subject site. As defined in the ASTM Standard, a REC is:

The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

This report describes Kleinfelder’s assessment methodology and documents our assessment findings, subject to the limitations presented in Section 2.5 of this report.
2.2 DETAILED SCOPE OF SERVICES

The following sections describe Kleinfelder's work scope:

- **Section 2, Introduction**, includes a discussion of the purpose/reason for performing the Phase I ESA, additional services requested by the Client (e.g., an evaluation of business environmental risk factors associated with the subject site), significant assumptions (e.g., property boundaries if not marked in the field), limitations, exceptions, and special terms and conditions (e.g., contractual), and user reliance parameters.

- **Section 3, Site Description**, is a compilation of information concerning the site location, legal description (if provided), current and proposed use of the subject site, physical setting, and geologic and hydrogeologic conditions.

- **Section 4, History of the Site**, summarizes the history of land use at the site and on adjoining properties. The history was developed by conducting interviews, reviewing information provided to Kleinfelder by the client and by consulting various resources such as aerial photographs, agency files, and historic maps.

- **Section 5, Records Review**, is a compilation of Kleinfelder's review of several databases available from the Federal, State, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the subject site; and for off-site facilities up to a one-mile radius around the site.

- **Section 6, Site Reconnaissance**, describes Kleinfelder’s site observations during the site reconnaissance and observations of adjacent parcels.

- **Section 7, Interviews**, is a summary of telephone and personal interviews conducted with “Key Site Managers” that may include the owner/manager of the facility, occupants/tenants, local government officials, and the Client. Additional interview sources may be contacted if “Key Site Managers” are not available prior to production of this report, and may include adjoining landowners and people with historical knowledge of the area.

- **Section 8, Evaluation**, is a presentation of our findings and conclusions regarding the information in Chapters 3 through 6; and presents our opinion
regarding the presence of Recognized Environmental Conditions of concern at the site.

- Section 9, References, is a summary of some of the resources used to compile this report.

The appendices contain certain pertinent documentation regarding the subject site. Appendix A presents site maps and photographs. Appendix B contains the qualifications of the environmental professionals responsible for the preparation of this report. Appendices C, D, and E contain supporting documentation for interview and regulatory agency documentation, historical records review, and database review records, respectively. Appendix F contains user-provided information.

### 2.3 SIGNIFICANT ASSUMPTIONS

The property boundaries were estimated for records searches and the site reconnaissance using maps provided by Parsons (Sheet LRT 17(C)).

### 2.4 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and are unlikely to identify all environmental problems or eliminate all risk. The attached report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations.

The scope of this ESA does not incorporate ASTM Standard non-scope considerations, such as asbestos in building materials or lead in paint, radon, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, high voltage power lines, indoor air quality, and vapor intrusion as a contributing indoor air quality issue.

Kleinfelder offers various levels of investigative and engineering services to suit the varying needs of different clients. It should be recognized that definition and evaluation of geologic and environmental conditions are a difficult and inexact science. Judgments leading to conclusions and recommendations are generally made with incomplete knowledge of the subsurface conditions present due to the limitations of
data from field studies. Although risk can never be eliminated, more-detailed and extensive studies yield more information, which may help understand and manage the level of risk. Since detailed study and analysis involves greater expense, our clients participate in determining levels of service that provide adequate information for their purposes at acceptable levels of risk. More extensive studies, including subsurface studies or field tests, can be performed to reduce uncertainties. Acceptance of this report will indicate that Parsons has reviewed the document and determined that it does not need or want a greater level of service than provided.

Kleinfelder performed this environmental site assessment in general accordance with the guidelines set forth in the ASTM and AAI Standards, and the proposed scope subsequently approved by our Client. This work was performed in a manner consistent with that level of care and skill ordinarily exercised by other members of Kleinfelder’s profession practicing in the same locality, under similar conditions and at the date the services are provided. Our conclusions, opinions and recommendations are based on a limited number of observations and data. It is possible that conditions could vary between or beyond the data evaluated. Kleinfelder makes no other representation, guarantee or warranty, express or implied, regarding the services, communication (oral or written), report, opinion, or instrument of service provided. Environmental issues not specifically addressed in this report were beyond the scope of our services and not included in our evaluation.

This report may be used only by the Client and only for the purposes stated within a reasonable time from its issuance, but in no event later than 180 days from the date of the report (ASTM Standard, Section 4.6). Land or facility use, on- and off-site conditions, regulations, or other factors may change over time, and additional work may be required with the passage of time. Since site activities and regulations beyond our control could change at any time after the completion of this report, our observations, findings, and opinions can be considered valid only as of the date of the site visit.

During the course of the performance of Kleinfelder’s services, hazardous materials may have been discovered. Kleinfelder assumes no responsibility or liability whatsoever for any claim, loss of property value, damage, or injury that results from preexisting hazardous materials being encountered or present on the project site, or from the discovery of such hazardous materials. Nothing contained in this report should
be construed or interpreted as requiring Kleinfelder to assume the status of an owner, operator, or generator, or person who arranges for disposal, transport, storage or treatment of hazardous materials within the meaning of any governmental statute, regulation or order. Parsons or the property owner is solely responsible for directing notification of all governmental agencies, and the public at large, of the existence, release, treatment or disposal of any hazardous materials observed at the project site, either before or during performance of Kleinfelder's services. Parsons or the property owner is responsible for directing all arrangements to lawfully store, treat, recycle, dispose, or otherwise handle hazardous materials, including cuttings and samples resulting from Kleinfelder's services.

2.5 SPECIAL TERMS AND CONDITIONS

No special terms and conditions in addition to those discussed previously were agreed to by the Client and Kleinfelder in our work order for this project.
3. SITE DESCRIPTION

This section describes the condition of the site at the time the Phase I ESA was conducted and provides information about the site description and local geologic and hydrogeologic conditions.

3.1 SITE DESCRIPTION

The site consists of four adjacent parcels over 15 acres, and is in the same general configuration as it was when it was an operational station for the base’s Quartermaster through its closure in 1994. The western and southern parcels are currently owned by the Transportation Agency of Monterey County (TAMC); the eastern parcel is owned by the City of Marina. The site is shown on Plates 1 and 2 in Appendix A.

The information presented in Table 3.1 describes the physical location of the subject site. This information was obtained from maps, public records, and interviews.

3.2 SITE SOILS

According to the information provided by the USDA web soil survey (http://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx) soils in the northern two-thirds of the subject site consist of Baywood sand (2 to 15 percent slopes) and soils in the southern one-third consist of Oceano loamy sand (2 to 15 percent slopes). The Baywood sand consists of somewhat excessively drained soils located on sand dune
toeslopes and rises. The Oceano loamy sand consists of excessively drained soils located on hill backslopes and side slopes.

3.3 REGIONAL AND LOCAL GEOLOGY

3.3.1 Regional Geology

The site lies within the Coast Range Geologic Province of California. This province is characterized by northwest-trending mountain ranges and intervening valleys, which are a reflection of the dominant northwest structural trend in bedrock of the region. In the vicinity of the project site within Monterey County, bedrock is comprised of granitic plutonic rocks of the late Mesozoic Salinian Block, which are similar in mineral composition, chemistry, and age to the central Sierran Batholith and are assumed to have been separated from the southern Sierra Nevada and transported north by the San Andreas Fault system (Harden, Deborah R., 1998, California Geology). The Salinian Block is fault bounded on the west by the Sur-Nacimiento fault and on the east by the San Andreas fault. Surface soils in the vicinity of the project site are composed of alluvium derived from granitic rock.

3.3.2 Local Geology

The project area is located on Older dune sands of Pleistocene age composed of coastal dunes with a maximum thickness of 82 feet consisting of weakly to moderately consolidated, moderately to well-sorted, silt and sand. The upper six meters are locally indurated by clay and iron oxide cementation in the weathered zone (Clark et al, 1997). The topography consists of generally flat areas surrounding and including the site.

3.4 GROUNDWATER

The California Department of Water Resources well data library (http://www.water.ca.gov/waterdatalibrary/) does not show any wells within six miles of the subject site. Research performed by EDR showed one well within one mile of the subject site, although depth to groundwater was not recorded. As part of the Base Realignment and Closure (BRAC) process at the Former Fort Ord, groundwater elevations in the northern portion of the military installation are being measured and reported on a quarterly basis. The most current, publicly-available report (MACTEC,
2009) reports that there is one well adjacent to the subject site, at which groundwater was measured at 95.89 feet below the top of the well casing (3.86 feet above mean sea level). Based on the contours presented by MACTEC, the groundwater gradient appears to be to the west-southwest toward the Monterey Bay in the A Aquifer, which is the shallowest of the aquifers in this area. General groundwater depth and direction may be influenced by local pumping, rainfall, and irrigation patterns. Evaluation of such factors is beyond the scope of this assessment.
4. HISTORY OF THE SITE

The history of the site was researched to identify obvious uses of the site from the present to first developed use or back to 1940, whichever is earlier. The objective was to evaluate the likelihood that past uses resulted in Recognized Environmental Conditions. Table 4.1 summarizes the information reviewed during this assessment. Kleinfelder used this information to establish the site history.

4.1 AERIAL PHOTOGRAPHS

A review of historical aerial photography may indicate past activities at a site that may not be documented by other means or observed during a site visit. The effectiveness of this technique depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from several historical photograph collections through EDR. Copies of the aerial photographs obtained by Kleinfelder are included in Appendix D.

1956

The site is shown as developed with paved roads and parking areas surrounding most of the structures. A rail spur is visible entering the southwestern corner of the site and splitting into two spurs: one running along the western side of the site, and the other running through the middle of the site; both extending almost to 8th Street. Twenty structures, likely warehouses, are visible on the subject site, as are what appear to be rail cars on the spur line through the middle of the site. Most of the buildings are visible in three rows oriented north-south. Objects that appear to be automobiles are visible on empty lots at the northern and southern ends of the easternmost row of buildings.

State Highway 1 is visible on the western border of the subject site, as is the railroad beyond it. The properties to the north, east, and south of the subject site are developed with paved roads and structures. Roads in the locations of the present-day 8th Street and 1st Avenue are visible.

1968

The quality of this photo is poor. A 21st structure is visible on the subject site near the northern end of the westernmost row of buildings. Another structure appears to have been added to the property adjacent to the east side of the northernmost part of the site. Structures that appear to be a wastewater treatment plant are visible approximately 450 feet northwest of the site (across State Highway 1 and the railroad tracks). Otherwise, the surrounding properties appear to be essentially unchanged from the 1956 photo.
1975
The quality of this photo is poor. The subject site and surrounding properties appear to be essentially unchanged from the 1968 photo.

1981
The quality of this photo is poor. The building first visible in the 1968 photo appears to have been replaced by a larger structure. Buildings on a property approximately 1800 feet east of the site appear to have been replaced by other buildings. Otherwise, the site and surrounding properties appear to be essentially unchanged from the 1975 photo.

1987
The quality of this photo is very poor. The building first visible in the 1981 photo is no longer visible. Demolition of additional buildings and adding others appears to have happened on the property approximately 1,800 feet east of the site. Otherwise, the subject site and surrounding properties appear to be essentially unchanged from the 1981 photo.

1998
The subject site and surrounding properties appear to be essentially unchanged from the 1987 photo.

2005
The subject site and surrounding properties appear to be essentially unchanged from the 1998 photo.

4.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan areas and small, established towns. Sanborn maps were not available for this site.
4.3 HISTORICAL TOPOGRAPHIC MAPS

Kleinfelder obtained information regarding historical topographic map of the site vicinity from EDR. The topographic maps reviewed for this assessment are summarized below. Copies of the maps are included in Appendix D.

MONTEREY, 15 Minute Series, 1913, 1 inch = 5,208 feet
The area around the subject site is depicted as undeveloped and denoted as the Lands of Monterey. The Southern Pacific Rail Road line west of the site is visible, as are a paved road to the east and a paved road (indicated on the map by a solid line) to the west along the coastline.

MONTEREY, 15 Minute Series, 1947, 1 inch = 5,208 feet
The subject site is shown as developed, with 15 structures and a railroad spur on the site, and denoted as part of the Main Garrison portion of Fort Ord. The railroad spur appears to split from the main line and cross State Highway 1 southwest of the site, enter the site at its southwestern corner, continue past a road in the location of the present-day 8th Street, cross the northern site boundary, and then re-cross State Highway 1 and rejoin the main line. State Highway 1 is shown on the map at its present-day location west of the subject site and east of the railroad. Additional structures and paved roads are shown to the north, east and south of the site.

MARINA, 7.5 Minute Series, 1948, 1 inch = 2,083 feet
The subject site is shown with 20 structures. On this map, the rail spur is depicted as splitting into three spurs on the site: one that runs along the western side of the westernmost row of buildings and terminates after passing the fourth building; one that runs along the eastern side of the westernmost row of buildings and terminates just after that row; and one that runs along the western side of the middle row of buildings, crosses 8th Street, and then crosses State Highway 1 and rejoins the main line. A sewage disposal plant is depicted northwest of the site, across State Highway 1 and the railroad tracks. Otherwise, the site and surrounding areas appear unchanged from the 1947 topographic map.
MARINA, 7.5 Minute Series, 1947 photorevised 1968, 1 inch = 2,000 feet
The subject site is shown as essentially unchanged from the 1948 topographic map. Additional development is depicted in other areas on Fort Ord and in an area south of the site labeled Noche Buena. The sewage disposal plant is not shown on this map.

MARINA, 7.5 Minute Series, 1947 photorevised 1974, 1 inch = 2,000 feet
The subject site is shown as essentially unchanged from the 1968 topographic map, with the exception that a major paved east-west road that formerly passed through the southern portion of the subject site is no longer shown on the map. Additional development is depicted on and off of Fort Ord. No other changes on surrounding properties are depicted.

MARINA, 7.5 Minute Series, 1947 photorevised 1983, 1 inch = 2,000 feet
The subject site and surrounding properties are shown as essentially unchanged from the 1974 topographic map.

4.4 BUILDING DEPARTMENT RECORDS

Because both Seaside and Marina have jurisdiction in this portion of Fort Ord, Kleinfelder contacted both their planning departments to obtain records related to site development. Because the base remained a federal property until the early 1990s with no construction at the subject site since the base’s closure, there were no files available for review from the planning departments of Marina or Seaside.

4.5 PREVIOUS ASSESSMENTS

Fort Ord Redevelopment Agency (FORA) Parcel Transfer Documents
According to the FORA Parcel transfer documents, the subject site is made up of three Transfer Parcels: 16.1, 16.2, and 16.3. According to these documents, seven storehouses were built on the subject site in 1940, six warehouses were built in 1941, five structures associated with a gas station were built in 1941, and an additional warehouse was built in 1953. An administration building was also listed on the subject site, but no construction date was noted. Due to the age of the structures, lead-based paint and asbestos-containing building materials are likely to be encountered.
Based on the most recently-available quarterly groundwater monitoring report, a groundwater contamination plume exists adjacent to, and north of, the subject site (MACTEC, 2009). This plume is defined by trichloroethene (TCE) and is assumed to be a result of historical use and improper disposal of solvents in the Site 12 area. A groundwater treatment system is being operated to contain and remediate the Site 2/12 TCE plume.

**Phase II Environmental Site Assessment, Kleinfelder, 2003**

Kleinfelder performed a Phase II Environmental Site Assessment along the railroad alignment to the west of the subject site in 2003. In the area of the subject site, metals and diesel-range organics were not found in excess of regulatory limits. Chlorinated herbicides and creosote concentrations were reported to be below laboratory detection limits. The top two feet of soil excavated for these samples was classified as fine- to medium-grained, low plasticity, clayey sand (Kleinfelder, 2003).

A DEIR was also prepared for the property adjacent to, and west of, the subject site (Environmental Science Associates, 2004). This DEIR noted that this property adjacent to the subject site was used by the military as a firing range. The dune soils have been remediated, and the DEIR stated that human health risks and hazards posed by residual metals from the firing ranges were considered unlikely. The DEIR also stated that cleanup of oil and petroleum-impacted soils along the railroad line has been completed. The DEIR noted the likely presence of lead-based paint and asbestos-containing building materials in any structures, and also described the presence of a groundwater contamination plume.

**Draft Environmental Impact Report, Denise Duffy & Associates, 2008**

A Draft Environmental Impact Report (DEIR) was prepared for the property adjacent to, and south of, the subject site (Denise Duffy & Associates, 2008). The DEIR identified this property adjacent to the subject site as a former motor pool which had been adequately remediated. The DEIR also noted the potential for lead-based paints, asbestos-containing building materials, and ordnance and explosives to be present on the property, based on its history and age. The possible presence of a groundwater contamination plume under the property was also stated.
Finding of Suitability to Transfer (FOST) Track 0 Parcels, Fort Ord, California, May 2003, by Thomas Lederle, DA BRAC

The following information was presented within the FOST, which discusses four of the five parcels located at the site. A copy of the FOST and applicable appendices is included in Appendix C.

Parcel: L20.16.1
- Categorized as Environmental Condition of Property (ECP) Category 3, which consists of “areas where release, disposal, and/or migration of hazardous substances has occurred, but at concentrations that do not require a removal or remedial response”
- Recipient: Monterey County, for use as RR Spur Intermodal Warehouses
- Acreage: 3.9 acres
- Structures: 6 warehouses, constructed in 1941, building numbers: 2060, 2061, 2062, 2063, 2064, 2065. Asbestos is present at each structure. Lead-based paint is assumed for each structure based on date of construction.
- Subsurface concerns: Migration of VOCs from RI sites 2 and 12 groundwater plume, but at concentrations that do not require a remedial response.
- Applicable Environmental Protection Provision Notices:
  - Notice of contaminated groundwater
  - Notice of hazardous substance storage, release or disposal
  - Notice of the potential for ordnance and explosives
  - Notice of the presence of asbestos
  - Notice of the presence of lead-based paint
  - Notice of the presence of PCBs

Parcel: L20.16.2 (southern portion of parcel is within subject site boundaries)
- Categorized as ECP Category 4, which consists of “areas where release, disposal, and/or migration of hazardous substances has occurred, and all removal or remedial actions to protect human health and the environment have been taken”
- Recipient: Monterey County, for use as RR Spur Intermodal Trans
- Acreage: 10.6 acres
- Structures:
7 storehouses, constructed in 1940, building numbers: 2030, 2031, 2032, 2033, 2034, 2035, 2036;
5 gas station structures, constructed in 1941, building numbers: 2037, 2039, 2040, 2041, 2042;
1 warehouse, constructed in 1953, building number: 2071;
1 administration building, constructed at an unknown date, building number: R203

Subsurface concerns:
- Migration of VOCs from RI sites 2 and 12 groundwater plume at concentrations exceeding MCLs\(^1\).
- Underground storage tanks, removed from the site (see table below):

  - Notice of contaminated groundwater
  - Notice of hazardous substance storage, release or disposal
  - Notice of the potential for ordnance and explosives

Finding of Suitability for Transfer (FOST) Blanco Road Parcel, Former Fort Ord, California, June 1993, by Toni B. Wainwright, US Army TRADOC

Kleinfelder reviewed this FOST, which was described on the fortordcleanup.com website to contain information on the Blanco Road and Building 2058 parcel transfers, however, upon review of this document, the structure at the site labeled Building 2058 is not included. Kleinfelder was unable to obtain additional information regarding parcel L2.1 or Building 2058, however, based on the usage, construction years, and concerns of the structures on the site to the north (belonging to parcels L.20.16.1 and L.20.16.2) Kleinfelder assumes that parcel L2.1 and structure have similar environmental concerns.

4.6  CITY DIRECTORIES

Since the subject site did not have a standard US Post Office address, and would not have been listed in the City Directories, a City Directory search was not performed.
4.7  **PRELIMINARY TITLE REPORT**

Kleinfelder was not provided a preliminary title report for the site prior to the completion date of this report.

4.8 **ENVIRONMENTAL LIENS**

EDR was unable to obtain an environmental lien report for the subject site.

4.9 **VALUE REDUCTION**

As part of the ASTM E 1527-05 process, information must be gathered regarding the prospective purchase price of the property relative to the fair market value of the subject site. If there appears to be a value reduction, that reduction must be identified with respect to whether the difference could be attributed to environmental degradation of the property. At this time, the project is in the feasibility stage. Purchase price has not yet been evaluated. As such, a comparison of purchase price to fair market value cannot be made.
5. RECORDS REVIEW

5.1 REGULATORY AGENCY DATABASE REVIEW

The purpose of the records review is to obtain and review records that would help to reveal Recognized Environmental Conditions in connection with the subject site and bordering properties.

Federal, State and local regulatory agencies publish databases or “lists” of businesses and properties that handle hazardous materials or waste, or are known locations of a release of hazardous substances. These databases are available for review or purchase at the regulatory agencies, or they can be obtained through a commercial database service. Kleinfelder contracted with a commercial database service, Environmental Data Resources, Inc., to review the agency lists for references to the site and any listings within the appropriate ASTM minimum search distance from the site. The federal and state databases reviewed are summarized on Table 5.1.

EDR PROPRIETARY RECORDS

<table>
<thead>
<tr>
<th>Database</th>
<th>Search Radius</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manufactured Gas Plants</td>
<td>1-mile</td>
</tr>
</tbody>
</table>

(Databases shown in bold contained one or more facility listing within the search radius specified.)

A summary of facilities listed in the databases is presented in the executive summary of the EDR report, and each facility is cross-referenced with a radius map showing the location of the listed facility with respect to the subject property. Kleinfelder conducted a review of the EDR report to assess which listings have a significant potential to impact the subject property. Factors used to screen the listed properties include distance to the site, geology, presumed or known direction of groundwater flow, type and magnitude of hazardous material release, and nature of sensitive receptors. A copy of the EDR report is included in Appendix E of this report.

5.2 RESULTS OF DATABASE SEARCH

The database report contained four listings, two of which are referred to as Fort Ord, within the applicable search distances. Kleinfelder reviewed the information in the database report; this information is summarized below.

- The Former Fort Ord, which includes the site, was listed in the databases as a DOD site; as a RCRA treatment, storage and disposal facility; as being on the Final NPL list; in CERCLIS documenting all BRAC closure and remediation activities; in CORRACTS for the remediation activities; as a RCRA large-quantity generator; in US Engineering Controls for the various RODs; in US Institutional Controls for the groundwater use restriction due to contamination plumes; in ROD for a record of decision; PADS; and FINDS.

  Wastes generated and stored onsite included batteries, lamps, pesticides, ignitable wastes, corrosive wastes, reactive wastes, arsenic, cadmium, chromium, lead, mercury, silver, benzene, and tetrachloroethene (PCE). Approximately 30 violations were reported from 1987 to 1997.
Groundwater contamination with PCE, carbon tetrachloride, 111,-trichloroethane, and trichloroethene (TCE) was reported. See Section 4.5 for further discussion.

- Building 4493 8th Avenue on Fort Ord is listed in the LUST database for a leaking diesel underground storage tank discovered during tank closure and removal. The contaminated soil was removed and treated, and the file was closed in December 1998. According to the EDR report, this location is located in the presumed down-gradient direction from the subject site and, therefore, is not considered likely to impact the subject site.

- University Villages (VCA), 8th Street/1st Street in Marina is listed in the Envirostor database because the former Fort Ord was listed as a Federal Superfund site. According to a “No Further Action” letter from the California Department of Toxic Substances Control (DTSC) to Shea Homes Limited Partnership obtained from DTSC, a removal action was performed to remove soil impacted by lead-based paint (LBP). According to the EDR report, University Villages is approximately 700 feet northeast of the site.

Sites not plotted by EDR due to poor or inadequate address information are referred to as orphan sites. There are 25 unmapped sites in the EDR Report. The orphan summary/unmapped sites report was reviewed to assess the potential for off-site properties to be listed on databases that fall within the ASTM search distances. Based on our review, these orphan sites appear to be already discussed within the database listings, to be outside of the ASTM search distances or lacked sufficient address information to determine the location. Facilities lacking address information are not readily available based on the ASTM standard.

5.3 REGULATORY AGENCY CONTACTS

The following additional sources of environmental records were reviewed during this Phase I ESA for the purposes of meeting the ASTM Standard. Local regulatory agencies were contacted for reasonably ascertainable and practically reviewable documentation regarding RECs present at the subject site and adjoining facilities (Interview documentation is included in Appendix C). The following agencies were contacted for documentation:
Several of the agencies listed above were not contacted because information from the agency is listed in one or more of the regulatory databases reviewed by EDR, Inc. and summarized in the EDR Radius Map report (see Appendix B). The State Division of Oil and Gas was not contacted because information concerning oil and gas fields was obtained from published maps available in the EDR report. Map findings are discussed in Table 4-2. Information/responses from the agencies contacted is presented below:

City of Seaside’s Building and Planning Departments
Kleinfelder spoke with Mr. Rick Medina of Seaside’s Planning Department about files related to the subject site. According to Mr. Medina, there were no files relating to the site with in the City’s records.

Marina and Seaside Fire Departments
Kleinfelder contacted Marina and Seaside Fire Departments to request relevant records for the subject site. According to Chief Hinley of the Marina Fire Department and Katherine of the Seaside Fire Departments, no files are available for the subject site.

Monterey County Environmental Health Department
The Monterey County Department of Environmental Health Department was contacted regarding files for the site. According to Bronwyn Feikert and Diane Bernal, there are no files are available for the subject site. They referred Kleinfelder to BRAC and FORA contacts for more information.
Fort Ord Reuse Authority and Base Realignment and Closure Office
Kleinfelder contacted Melissa Broadston and Rob Robinson for in-house files related to the subject site. They referred Kleinfelder to www.fortordcleanup.com and the Finding of Suitability for Transfer (FOST) report for more information about the site. The FOST reports are summarized in Section 4.5 Previous Assessments.

State Fire Marshall, Pipeline Safety Division
Lisa Dowdy of the State’s Pipeline Safety Division was contacted about any natural gas pipelines within the ASTM search radii. According to Ms. Dowdy, there are no records within her office of pipelines at or adjacent to the subject site.

Regional Water Quality Control Board
Kleinfelder spoke with Mr. Grant Himbaugh of the RWQCB, who explained that the site falls within a “groundwater protection zone” where the drilling of wells is prohibited. He referred us to the Fort Ord Reuse Authority for additional information on the land use restriction.

Pacific Gas & Electric
Kleinfelder contacted Christian Kuhn of Pacific Gas and Electric (PG&E) to see if PG&E had easements on the site. Mr. Kuhn replied that there are none for the subject site, but a pipeline did run along the east side near 2nd Avenue.

The Marina Coast Water District
According to Mr. Gary Rogers, the MCWD maintains the on-site potable water source. The MCWD also maintains the storm drains and runoff control measures at the site.

Monterey Bay Unified Air Pollution Control District
Kleinfelder contacted Ms. Cindy Searson of the Monterey Bay Unified Air Pollution Control District (MBUAPCD). According to Ms. Searson, there are no files for the site.
6. SITE RECONNAISSANCE

Kleinfelder’s assessment activities included a site reconnaissance. This section summarizes the findings from the site reconnaissance.

6.1 METHODOLOGY AND LIMITING CONDITIONS

Kleinfelder representative Jim Woodard conducted a site reconnaissance on March 22, 2010, to assess and photograph present site conditions. The approximate site boundaries are shown on Plates 2 & 3, and color photographs of the site are shown on Plates 4 and 5. Site conditions discussed below are limited to readily apparent environmental conditions observed on the date of site reconnaissance.

6.2 ON-SITE OBSERVATIONS

The subject site consists of series of 13 buildings (the seven buildings comprising the westernmost row of buildings in aerial photographs are no longer present) within subject site area. Site access is by means of 2\textsuperscript{nd} Avenue and following the detour signs to the south side of the site.

Structures and improvements include 13 buildings near the southeast corner of the site and chain-link fencing enclosing the loading areas along Quartermaster Avenue. Storm drains and fire hydrants were observed throughout the site.

The rail spurs are visible at the south end of the site; however, the railways are paved over with asphalt concrete on the rest of the site.

In general, most of the buildings were secured with pad locks to prevent dumping and trespassing into the vacant buildings. Hazardous materials were not observed in buildings that were open for viewing.

Building 2071 on the north end of the site was open and showed signs of its use as a rescue training area for local fire departments. Numerous burned wood structures and furniture were observed in the building. No fuel or other hazardous substances were observed in the building.
One monitoring well was observed on site near Building 2071.

A pipeline marker was observed at the southeast corner of the site, near 2\textsuperscript{nd} Avenue.

Faded, cracked, and flaking paint was observed on all onsite buildings.

In addition, Mr. Woodard observed dumped debris and discarded garbage such as old tires and broken concrete debris near the south end of the site.

Site observations are summarized in Table 6.1.

7. INTERVIEWS

Kleinfelder requested a list of “Key Site Managers” for the project. Due to the nature of the project, which is in the initial feasibility stage, Key Site Managers were not available to interview.

7.1 INTERVIEW WITH OWNER/MANAGER

At the client’s request, Kleinfelder did not attempt to interview the building owner.

7.2 INTERVIEW WITH OCCUPANTS

At the client’s request, Kleinfelder did not attempt to interview building occupants.

7.3 INTERVIEW WITH CLIENT

Client did not provide a person with knowledge of the site to interview.

7.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Local government officials were contacted to obtain further information about environmental enforcement actions pending or ongoing at the site and adjacent facilities, or relevant permits (e.g. building, air quality, well abandonment, etc.) for the site and adjoining properties.

Kleinfelder’s conversations with government officials are summarized in Section 5.3 Regulatory Agency Contacts.
8. EVALUATION

Kleinfelder performed this Phase I ESA in general accordance with the scope and limitations of ASTM Practice E-1527-05 and the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law). The purpose of this assessment was to evaluate the likelihood of RECs or other environmental conditions resulting from the present or past usage, storage, or disposal of hazardous substances or petroleum hydrocarbons at the subject site and in the surrounding area. Kleinfelder’s findings and conclusions are presented below.

8.1 FINDINGS

The subject site consists of three parcels, Monterey County Assessor’s APN 031-221-014, 031-122-003, and a portion of 031-221-005. All three parcels are located on the former Fort Ord, and are developed with 13 structures, paved roads and parking areas. The remaining structures were used as warehouses, storehouses and an administrative building. A set of railroad spurs on the subject site were used to supply the warehouses.

Kleinfelder’s Phase I ESA of the subject site revealed the following RECs associated with the site:

- Based on documented site use (gas station at southern end of site), there is the potential for leaked petroleum hydrocarbons to be present in site soils and groundwater in the area of the former gas station. Even though Fort Ord documents indicate that the tanks were removed under guidance of the MCEHD, letters of closure were not available. Based on information provided within the FOST, eleven 12,000-gallon USTs were in operation in the northwest corner of the site, indicated on Plate 2 as “former tank area.” Specifics for each tank are presented in Section 4.5.

- Three rail spurs were reportedly located on the site and, based on observations, remain on the site. Potential contamination associated with railroads includes petroleum hydrocarbons, polychlorinated biphenyls (PCBs), pesticides, herbicides, polynuclear aromatic hydrocarbons (PAHs), and metals.
• A monitoring well established on the site indicates that there is a potential for impacted groundwater from the OU-2 plume (located to the north and northeast) to migrate beneath the site. In addition, the site is located within a restricted land use zone that prohibits drilling wells for drinking water or landscaping use.

8.2 OTHER ENVIRONMENTAL ISSUES

Although not considered RECs by definition, the following other environmental conditions are described below:

• A portion of the site is used for vehicle parking and storage. This area has a gravel cover over soil. Kleinfelder assumes that minor leaks have occurred from these parked vehicles, however, these small leaks are likely to be a de minimis condition that does not require additional investigation. In the event that leaks are determined to be significant based on other information, this conclusion should be re-evaluated.

• Lead-based paint (LBP) and asbestos-containing materials (ACM) are outside our scope of work. However, based on the age of the structures, LBP and ACM could be present in or on structures on the site. A survey of LBP and ACM would need to be performed to confirm or deny the presence of these materials.

8.3 DEVIATIONS AND ADDITIONAL SERVICES

The scope of this ESA does not incorporate ASTM Standard non-scope considerations, such as asbestos/lead-based paint, radon, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, high voltage power lines, indoor air quality, and therefore vapor intrusion as a contributing indoor air quality issues.

8.4 CONCLUSIONS AND RECOMMENDATIONS

Kleinfelder identified RECs related to the potential for release of petroleum hydrocarbons and other hazardous materials from on-site sources. Off-site sources may include the potential TCE plume north of the subject site. Kleinfelder recommends that this report be updated to include interviews with the owner and occupants and a complete site reconnaissance. The additional information should be used to establish a
soil and groundwater sampling strategy to assess actual impacts to soil and groundwater. Additional work may also be recommended depending on the results of the interview and reconnaissance.

8.4.1 Data Gaps

Although Kleinfelder attempted to obtain reasonably ascertainable information regarding the site, some information was either not received or not readily available at the time of this report. Therefore, consistent with ASTM Standard Practice E-1527-05, the following data failure (data gaps) have been identified:

- Kleinfelder was unable to obtain an EDR lien search report for the site.
- Kleinfelder was unable to interview the client, due to confidentiality issues of this project.
- Kleinfelder did not attempt to interview the current tenants from the Seaside Fire Department, Marina Fire Department, the Naval Postgraduate School, and Habitat for Humanity.
- Kleinfelder did not access the buildings’ interiors of all on-site buildings during the site reconnaissance, due to the confidentiality issues of this project.

Based on a review of the data gaps presented above, it is Kleinfelder’s opinion that the data failures may have affected the evaluation of the RECs at the site. If the client proceeds with site acquisition, Kleinfelder recommends that attempts be made to address the above-referenced data gaps.

APPENDIX B
QUALIFICATIONS OF
ENVIRONMENTAL PROFESSIONALS
STATEMENT OF QUALIFICATIONS

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in CFR Part 312.

Bradley G. Erskine, PhD, PG, CHG, CEG
Environmental Practice Lead
Transportation Division

Derby Davidson, PE
Senior Engineer

Sarah Kalika, PG, REA
Project Geologist

The resumes of above-listed environmental professionals performing this environmental site assessment are on file at the Kleinfelder office and are available on request.
APPENDIX C
PERMIT TO OPERATE

MONTEREY BAY UNIFIED AIR POLLUTION CONTROL DISTRICT

OPERATION UNDER THIS PERMIT MUST BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS INCLUDED IN THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED. THE EQUIPMENT MUST BE PROPERLY MAINTAINED AND KEPT IN GOOD CONDITION AT ALL TIMES. THIS PERMIT TO OPERATE MUST BE POSTED OR ACCESSIBLE.

LEGAL OWNER: U. S. ARMY
OR OPERATOR: Building 2041

EQUIPMENT LOCATED AT: Port Ord, CA 93941

EQUIPMENT DESCRIPTION AND CONDITIONS: GASOLINE STORAGE TANKS

Two 12,000 Gallon Underground Gasoline Storage Tanks Each Equipped With A Submerged Fill Pipe and OPW Vapor Recovery Equipment.

THIS PERMIT BECOMES VOID UPON ANY CHANGE OF OWNERSHIP OR ADDRESS, OR ANY ALTERATION.

This permit does not authorize the emissions of air contaminants in excess of those allowed by Article 1, Chapter 3, Part 4, Division 26 of the Health & Safety Code of the State of California or the Rules and Regulations of the Air Pollution Control District. This permit cannot be considered as permission to violate existing laws, ordinances, regulations or statutes of other governmental agencies.

APCD 3

AIR POLLUTION CONTROL OFFICER

DATE August 30, 1979
MONTEREY BAY UNIFIED AIR POLLUTION CONTROL DISTRICT
1270 Natividad Rd. Salinas 93906 - (408) 758-3861
APPLICATION FOR AUTHORITY TO CONSTRUCT AND PERMIT TO OPERATE
RULE 418 - GASOLINE STORAGE AND VAPOR RECOVERY

Application Instructions
A. Use this form for gasoline storage tanks only. Gasoline is defined as any petroleum distillate with a Reid vapor pressure of 4 pounds or more.
B. Submit application in duplicate. One application will suffice for each storage location.
C. A file fee of $20 is required per application.
D. If storage facility is undergoing a transfer of ownership and a valid District permit exists, the application fee is $10.
E. Make checks payable to Monterey Bay Unified APCD.

APCD Use Only

Application No. 152 Date Stamp 0595

ROBERT D. GREMER, JR Date 21 JUN 1978
Colonel, CE
Dir, Fac Eng

Unknown at this time.
Contractor's name, address & phone No.
This permit to operate is issued and is valid for this equipment only while it is in the configuration set forth in the following description:

GASOLINE STORAGE TANKS AND LOADING FACILITY

Two 12,000-Gallon Underground Gasoline Storage Tanks, Each With Dual Point Recovery And Submerged Fill Equipment.

Loading Rack Equipped For Top-Loading Of Delivery Vessels.

The equipment for which this permit to operate is issued may be operated only when in compliance with the following conditions:

Conditions:

1. Annual gasoline throughput shall be reported to the District, upon request, at the time of annual permit renewal.

2. The permittee shall notify the District if there is any change in ownership or operation of this facility.

3. No more than 500,000 gallons per year or 20,000 gallons per day shall be delivered to non-exempt tanks.

Note: This Permit replaces P/O #754, issued to Fort Ord in the year 1979. The annual permit renewal date remains as before: August 30.

*****

This permit becomes void upon any change of ownership or address, or any alteration.

PERMIT # 5369 - CANCELED

REPLACED BY PERMIT #

SOURCE NAME

RENEWAL DATE: 
August 20, 1997

Commander, DLIFLC & PCM
Department of the Army
ATTN: ATZP-EP (Mark Reese)
Presidio of Monterey, CA 93944-5006

SUBJECT: Cancellation of Permits to Operate P-1402, P-1775, 5369, 6514, and 6781

Dear Mr. Reese:

I have canceled the following permits in response to your August 18, 1997 letter request:

<table>
<thead>
<tr>
<th>Permit No.</th>
<th>Location</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P-1402</td>

<td>BLDG. 1434</td>
<td>Solvent Storage Tanks</td>
</tr>
<tr>
<td>6781</td>
<td>BLDG. 1670</td>
<td>Gasoline Dispensing Facility</td>
</tr>
</tbody>
</table>

If you should have any questions please feel free to contact me at the District office.

Sincerely,

Fred Thoits
Engineering Division Manager
Mr. Fred Thoits  
Monterey Bay Unified Air  
Pollution Control District  
24580 Silver Cloud Court  
Monterey, CA 93940  

Dear Mr. Thoits:

Please cancel permits #1402, 1775, 5369, 6514, and 6781. Activities associated with these permits are no longer needed due to the closure of Fort Ord.

If you have any questions regarding this matter, contact Ms. Christine Lawson, Environmental Scientist, at (408)242-7929.

Sincerely,

[Signature]

ADDRESS: Fort Ord, CA

PERMIT NO.: 5369

Pursuant to the provisions of Section 41960.2(e) of the California Health and Safety Code, you are hereby notified that a component of the gasoline vapor recovery system at this facility has been found to be not in good working order, as follows:

PROBLEM: Faceplate on nozzle (Unloaded)

REQUIRED CORRECTION: Replace above noted faceplate

Operation of this facility in this condition constitutes a violation of District Rule 1002, which requires operation of a vapor recovery system as it was certified by the California Air Resources Board. If this problem is corrected within seven (7) days, you will not be subject to liability for the violation.

If correction is not made by 1 Feb 93, you will be liable for this violation of Rule 1002, and may be liable for any continuing violation if operation continues beyond that date.

Colonel Wesley A. Ludwig  
Director of Engineering and Housing  
Attn: AFZW-DE  
Fort Ord, CA 93941-5777  

SUBJECT: Permits to Operate Nos. 5369-5373, 5641, 5644, and 6062  
Gasoline Dispensing Facilities  

Dear Colonel Ludwig:

The District has completed its inspection and evaluation of eight gasoline dispensing facilities at the following locations:

<table>
<thead>
<tr>
<th>Permit No.</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>5369</td>
<td>Bldg. 2041, Ft. Ord</td>
</tr>
<tr>
<td>5370</td>
<td>Bldg. 1060, Ft. Ord</td>
</tr>
<tr>
<td>5371</td>
<td>Bldg. 4220, Ft. Ord</td>
</tr>
<tr>
<td>5372</td>
<td>Bldg. 230, Presidio</td>
</tr>
<tr>
<td>5373</td>
<td>Bldg. 1670, Ft. Ord</td>
</tr>
<tr>

</tbody>
</table>

We have determined the facilities are currently in compliance with District Rules 418 and 1002, "Transfer of Gasoline Into Stationary Storage Containers," and, "Transfer of Gasoline Into Vehicle Fuel Tanks," respectively. Accordingly, Permits to Operate have been issued and are enclosed. **EACH PERMIT MUST BE POSTED OR KEPT READILY AVAILABLE AT THE OPERATING PREMISES.** Please note the conditions associated with the Permits to Operate.

A permit fee balance of $2138.00 is due and payable within thirty (30) days, and is based on the provisions of Rule 301, Schedule 9. Annual renewal fees will remain due as indicated on the second page of each permit. A courtesy reminder statement will be mailed to you before the permit renewal dates.

If you have any questions, please contact me at the District office.

Sincerely,

Eva Goodman  
Air Pollution Control Engineer I

EQUIPMENT
DESCRIPTION
AND
CONDITIONS:

THIS PERMIT TO OPERATE IS ISSUED AND IS VALID FOR THIS EQUIPMENT ONLY WHILE IT IS IN THE CONFIGURATION SET FORTH IN THE FOLLOWING DESCRIPTION:

GASOLINE DISPENSING FACILITY (2):

Three 12,000 Gallon Underground Gasoline Storage Tanks, Each With Dual Point Vapor Recovery And Submerged Fill Equipment.

Two Tokheim Bennett Dual Dispensers With A Total Of Two Emco Wheaton Model 4001 Coaxial Balance Vapor Recovery Nozzles With Model 226 Remote Vapor Check Valves And Thermoid Coaxial Hoses.

THE EQUIPMENT FOR WHICH THIS PERMIT TO OPERATE IS ISSUED MAY BE OPERATED ONLY WHEN IN COMPLIANCE WITH THE FOLLOWING CONDITIONS:

Conditions:

1. Annual gasoline throughput shall be reported to the District, upon request, at the time of annual permit renewal.

2. The permittee shall notify the District if there is any change in ownership or operation of this facility.

**page 1 of 2**

THIS PERMIT BECOMES VOID UPON ANY CHANGE OF OWNERSHIP OR ADDRESS, OR ANY ALTERATION.

AIR POLLUTION CONTROL OFFICER

DATE: JUN 18 1991
3. All vapor line connections, fittings, lines and caps, and seals between nozzles and vehicles shall be vapor tight.

4. Nozzle operating instruction signs with the District or State telephone number for reporting complaints shall be clearly posted.

5. The gasoline pumping rate shall not exceed 10 gallons per minute.

6. The dispensers shall be equipped with the high-retractor or high-hang hose configuration.

7. Any representative of the Monterey Bay Unified Air Pollution Control District authorized by the Air Pollution Control Officer shall be permitted, pursuant to the authority contained in Section 41510 of the California Health and Safety Code:

   a) to enter upon the premises where the source is located or in which any records are required to be kept under the terms and conditions of the Permit to Operate;

   b) to have access to and copy any records required to be kept under the terms and conditions of this Permit to Operate;

   c) to inspect any equipment, operation, or process described or required in this Permit to Operate; and,

   d) to sample emissions from the source.

Note: This Permit to Operate replaces permit #755A issued to U.S. Army, Ft. Ord in the year 1989. The annual renewal date will remain August 30.

Attention: Mr. Gregory Chee

Gentlemen:

Phase II Vapor Recovery Permits

Enclosed please find the Permit Applications and associated fees for Phase II vapor recovery systems at the following buildings at the Fort Ord Complex:

Fort Ord

Building 1497
Building 4493
Building 4545

Presidio of Monterey

Building 124

Fort Hunter Liggett

Building 116
Building 194

The drawings contained in the permit applications are submitted in draft. If revisions are necessary after the Army's review, Harding Lawson Associates will resubmit drawings.

Also enclosed are revised drawings for Buildings 2041, 1060, 4220, 230 and 1670 at the Fort Ord Complex. As directed in your letter of March 28, 1990 to Harvey Jones of the Army Corps of Engineers, we have modified the designs for vapor recovery systems at these facilities so that Phase I and Phase II systems are not manifolded together. The permit application previously submitted for these buildings should be issued to Fort Ord
July 18, 1990

Sacramento, CA 95814-4794

SUBJECT: Authority to Construct
Nos. 5369 through 5373
Gasoline Dispensing Facilities

Dear Mr. Jones:

The District has completed its evaluation of the proposal to install the required Phase II vapor recovery systems at five gasoline dispensing facilities located at:

Building 2041, Railroad Ave., Ft. Ord
Building 1060, 2nd St. and Quarter Master, Ft. Ord
Building 4220, North-South Blvd., Ft. Ord
Building 230, Ft. Mervine Pl., Presidio, Monterey
Building 1670, 8th St. and 4th Ave., Ft. Ord

The proposed modifications have been tentatively approved. Accordingly, Authorities to Construct have been issued and enclosed, and must be posted or kept readily available at the respective operating premises.

With regards to the drawings already submitted to the District, we telephoned Mr. Christopher Smith of Harding Lawson Associates, on March 26, 1990 to indicate the systems proposed in the drawings were unapprovable. The systems are unapprovable because Phase I and Phase II are manifolded together, this is not certified by the California Air Resources Board to achieve 95 percent efficiency. Therefore, BEFORE CONSTRUCTION BEGINS NEW DRAWINGS MUST BE SUBMITTED TO THE DISTRICT FOR APPROVAL—note Authority to Construct conditions 1a. and 1b.

Furthermore, please note condition three requires performing a vapor blockage test, and condition number five requires posting
Mr. Harvey Jones  
U.S. Army Corp. of Engineer  
Page two:  

signs with operating instructions and the District telephone number. The District has a limited supply of these signs available for $1.00 each.

Based on the provisions of Rule 301 Schedule 9, the fee balance due for issuing the five Authorities to Construct is $3,701.00. This represents eighty (80) percent of the permit issuance fee and must be paid within thirty days. The remaining twenty (20) percent is due and payable thirty days after the Permit to Operate is issued. The Permit to Operate will be issued when the modification is completed and approved by the District.

Your cooperation in this matter is appreciated. Should you have any questions, please do not hesitate to contact me at the District office.

Sincerely,

Eva Goodman  
APC Engineer I

AUTHORITY TO CONSTRUCT

SALINAS, CALIFORNIA 93906 — TELEPHONE: (408) 443-1135

AN AUTHORITY TO CONSTRUCT IS GRANTED AS OF MAR 28 1990

LEGAL OWNER
OR OPERATOR:

U.S. ARMY, FORT ORD

EQUIPMENT LOCATED AT:

Building 2041
Railroad Avenue
Fort Ord, CA

EQUIPMENT DESCRIPTION AND CONDITIONS:

THIS AUTHORITY TO CONSTRUCT IS ISSUED AND IS VALID FOR THIS EQUIPMENT ONLY WHILE IT IS IN THE CONFIGURATION SET FORTH IN THE FOLLOWING DESCRIPTION:

GASOLINE DISPENSING FACILITY (3):

Installation Of A California Air Resources Board Certified Phase II Vapor Recovery System Including Three Coaxial Nozzles, Associated Nozzle Component Parts, and Underground Piping And Manifolding.

THE EQUIPMENT FOR WHICH THIS AUTHORITY TO CONSTRUCT IS ISSUED MAY BE OPERATED ONLY WHEN IN COMPLIANCE WITH THE FOLLOWING CONDITIONS:

Conditions:

1a. Details of the Phase II vapor recovery system, including but not limited to, drawings showing underground piping configuration, and nozzle, vapor check valve, flow limiter, dispenser, coaxial hose, and high hose retractor specifications, must be submitted to the District and receive District approval before construction or installation begins.

1b. The name of the contractor shall be furnished to the District before construction begins.

**page 1 of 2**

THIS AUTHORITY TO CONSTRUCT IS NOT A PERMIT TO OPERATE!

APPROVAL OR DENIAL OF THE APPLICATION FOR PERMIT TO OPERATE THE ABOVE EQUIPMENT WILL BE MADE AFTER AN INSPECTION TO DETERMINE IF THE EQUIPMENT HAS BEEN CONSTRUCTED IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS, AND IF THE EQUIPMENT CAN BE OPERATED IN COMPLIANCE WITH ALL RULES AND REGULATIONS OF THE AIR POLLUTION CONTROL DISTRICT.

PLEASE NOTIFY Eva Goodman AT (408) 443-1135 WHEN CONSTRUCTION OF EQUIPMENT IS COMPLETED.

IT IS THE APPLICANT'S RESPONSIBILITY TO COMPLY WITH ALL LAWS, ORDINANCES, AND REGULATIONS OF OTHER GOVERNMENTAL AGENCIES WHICH ARE APPLICABLE TO THE EQUIPMENT TO BE CONSTRUCTED.

THIS AUTHORITY TO CONSTRUCT WILL EXPIRE TWO YEARS FROM DATE SHOWN, OR EARLIER, IF ANY CHANGE OF OWNERSHIP OR LOCATION, OR MODIFICATION OCCURS.

APCD 2 (REV. 8/85)

AIR POLLUTION CONTROL OFFICER

DATE: MAR 28 1990
U.S. Army
Authority to Construct No. 5369
Page two:

2. The Phase II vapor recovery system shall be installed and fully operational by February 22, 1991.

3. Within thirty (30) days upon completion of construction, the permittee shall conduct and submit the results of a vapor blockage test of the Phase II vapor recovery system including nozzle, vapor hose, swivels, and underground piping. The District shall be notified a minimum of 48 hours prior to the vapor blockage test so that the District may be present to observe. The maximum allowable pressure drop through the system is as follows:

   a. 0.15 inch water at a flow of 80 CFH; or
   b. 0.45 inch water at a flow of 60 CFH; or
   c. 0.95 inch water at a flow of 100 CFH.

4. All vapor line connections, fittings, lines and caps, and seals between nozzles and vehicles shall be vapor tight.

5. Nozzle operating instruction signs with the District's telephone number for reporting complaints shall be clearly posted.

6. The gasoline dispensing rate shall not exceed 10 gallons per minute.

7. All dispensers shall be equipped with the high-retractor high-hang hose configuration.

8. Any representative of the Monterey Bay Unified Air Pollution Control District authorized by the Air Pollution Control Officer shall be permitted:

   a) to enter upon the premises where the source is located or in which any records are required to be kept under the terms and conditions of the Authority to Construct;

   b) to have access to and copy any records required to be kept under the terms and conditions of this Authority to Construct;

   c) to inspect any equipment, operation, or process described or required in this Authority to Construct; and,

   d) to sample emissions from the source.

NOTE: The permit to be issued upon completion of construction shall replace Permit to Operate No. 755A issued to the U.S. Army, Fort Ord in the year 1989. The annual permit renewal date will remain August 30.

Attachment to APCD Form #408 for
Building 2041, Fort Ord, California

The drawings included with this permit application are part of a design package which Harding Lawson Associates (HLA) is submitting to the Sacramento District of the Army Corps of Engineers. When this package has been approved by the Corps and put into final form, the project will go out for competitive bid.

The contractor selected in the bid process will be responsible for satisfying all requirements of the bid package, including the installation of equipment which satisfies California Air Resources Board regulations, Monterey Bay Unified Air Pollution Control District rules, and other applicable rules and regulations.

The schedule for completion of the work will be agreed upon by the selected contractor and the Army.

This draft permit application will be resubmitted by HLA upon finalization of the design package. Contractor-specific information will be submitted by either the Army or HLA when a contractor is selected.
GENERAL NOTES

1. The contractor shall verify all dimensions and conditions at each site. Any deviations from the drawings necessitated by field conditions shall be brought to the attention of the Contracting Officer and approved by him prior to starting any work.

2. The contractor shall verify with the facilities engineer the dates and times when equipment and materials will be allowed onto base.

3. All base regulations and requirements shall be strictly followed.

4. Pitch all vapor recovery piping up 1/2 inch per ft. from tank connections to risers at each dispenser.

5. All vapor recovery pipe shall be fiber-glass reinforced plastic except where indicated on detail.

6. All work near gasoline dispensing and storage tank areas shall be done in accordance with Class I Division 1 Hazardous Location National Electrical Code Requirements.

7. Installation of system components shall be in strict accordance with manufacturers' instructions and recommendations.

8. Vapor recovery systems shall be in compliance with all applicable codes and standards, and shall be certified by the California Air Resources Board.

9. When utility lines are encountered, that are not indicated on the drawings, the Contracting Officer shall be notified immediately.

10. Contractor shall preserve in operating condition, locate, otherwise notice, active utilities traversing project site. Contractor shall repair damage to such utilities caused by work under this contract to the satisfaction of the Contracting Officer.

11. If a utility disconnection will interrupt the utility services to an area not included in the contract, arrangements for such disconnection shall be made with the Contracting Officer at least 72 hours in advance of the interruption.

Subject: Address for L20.16.1, L20.16.2, and L20.16.3

Rob,

Thanks for your help. We're looking for an address for each of the following parcels:
- L20.16.1
- L20.16.2
- L20.16.3

I've attached a couple of maps with the parcels. The sites are split up between the two. Please call me if you have any questions. I should be in the office all day today.

Thanks again, Rob,
~ Jim

Caveats: FOUO
Hi Jim,

After my meeting with the Ft. Ord environmental staff and their consultants, we located your parcels on one of their master parcel maps and here's the results:

1. These parcels are in a "Track O - 'read zero' area" meaning munitions were not used in the area. There are no munitions concerns.
2. The parcels overlie a Monterey County groundwater protection ordinance area. That means no water wells drilled on these parcels without the permission of the County, Army and Ft. Ord regulators (Water Board, DTSC and EPA).
3. These parcels most likely have land use covenants - again relating to the prohibition of drilling water wells. DTSC would be the source for any additional information on this topic.

That covers it.

>>> "Jim Woodard" <JWoodard@kleinfelder.com> 3/3/2010 4:06 PM >>>
To the best of my knowledge, six feet is too far down the currently proposed construction for the site. If there is any change to that, I will let you know.

- Jim

>>> "Grant Himebaugh" <Ghimebaugh@waterboards.ca.gov> 3/3/2010 3:56 PM >>>
In case any of the property has explosives issues (outside my authority), does TAMC plan to excavate more than 6 feet deep anywhere on this property?

>>> "Jim Woodard" <JWoodard@kleinfelder.com> 3/3/2010 3:52 PM >>>
Yes, it's for a Phase I Environmental Site Assessment for the Transportation Agency of Monterey County (TAMC). TAMC owns the property.

- Jim

>>> "Grant Himebaugh" <Ghimebaugh@waterboards.ca.gov> 3/3/2010 3:46 PM >>>
Also, am I correct that this information is for a Phase I environmental assessment?

Hi Jim,
There was enough lag between your original phone call and February 24th email, that when your email didn't ask anything specific of me, I thought the email was just an fyi follow-up.
I've printed out your PDF map and will bring it to a meeting I have at Ft. Ord tomorrow. I should have a definitive answer to your question on Monday.
To clarify, I'm looking for known or suspected groundwater impacts. I'll also ask the Ft. Ord staff regarding any soil contamination (normally outside my scope). If you want any additional information, please let me know in the next hour.

Hi Grant,

Did you find any records relating to the listed parcels below? Please call me with any questions about the sites.
(831) 755-7900 x 2201

- Jim

"Jim Woodard" 2/24/2010 10:23 AM
Hi Grant,

Please see the attached reference and site information below. Parcel numbers are L16.20.1, L16.20.2, and L16.20.3

Based on other records, the site was a connection point for the rail line along the western edge of Fort Ord,
west and southwest of the intersection of 8th Street and 1st Avenue. There were some tanks removed in the mid '90s and there's an existing prohibition on tapping the groundwater below the site.

Thank you very much for your time. If you have any other questions, please call me at the office.

Jim

APPENDIX D
EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 11/01/2009 has revealed that there is 1 NPL site within approximately 1 mile of the target property.
### Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 06/30/2009 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

### Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/15/2009 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/11/2009 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2009 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 10/01/2009 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<table>

</tbody>
</table>

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 10/01/2009 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/09/2009 has revealed that there is

100 kg of that material at any time

### Owner/Operator Summary:
- **Owner/operator name:** JEFFREY S. CAIRNS, COL., US
- **Owner/operator address:** Not reported
- **Owner/operator country:** US
- **Legal status:** Federal
- **Owner/Operator Type:** Operator
- **Owner/Op start date:** 07/09/2003
- **Owner/Op end date:** Not reported

#### Handler Activities Summary:
- **U.S. importer of hazardous waste:** No
- **Mixed waste (haz. and radioactive):** No
- **Recycler of hazardous waste:** No
- **Transporter of hazardous waste:** No
- **Treater, storer or disposer of HW:** No
- **Underground injection activity:** No
- **On-site burner exemption:** No
- **Furnace exemption:** No
- **Used oil fuel burner:** No
- **Used oil processor:** No
- **User oil refiner:** No
- **Used oil fuel marketer to burner:** No
- **Used oil Specification marketer:** No
- **Used oil transfer facility:** No
- **Used oil transporter:** No
- **Off-site waste receiver:** Commercial status unknown

#### Universal Waste Summary:
- **Waste type:** Batteries
  - **Accumulated waste on-site:** No
  - **Generated waste on-site:** No
- **Waste type:** Lamps
  - **Accumulated waste on-site:** No
  - **Generated waste on-site:** No
- **Waste type:** Pesticides
  - **Accumulated waste on-site:** No
  - **Generated waste on-site:** No
- **Waste type:** Thermostats
  - **Accumulated waste on-site:** No
## USARMY FORT ORD (Continued)

**Generated waste on-site:** No

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS
CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Corrective Action Summary:
Event date: 04/01/1986
Event: CA049PA

Event date: 04/01/1986
Event: CA029SF

Event date: 06/01/1987
Event: CA049SI

Event date: 01/01/1988
USARMY FORT ORD (Continued)

Event: Stabilization Measures Implemented, Groundwater extraction and treatment (e.g., to achieve groundwater containment, to achieve MCL).
Event date: 12/01/1988

Event: Stabilization Construction Completed
Event date: 07/23/1990

Event: RFI Imposition
Event date: 07/23/1990

Event: CMS Imposition
Event date: 12/01/1991

Event: CMS Workplan Approved
Event date: 12/01/1991

Event: RFI Workplan Approved
Event date: 01/17/1995

Event: CA Prioritization, Facility or area was assigned a high corrective action priority.
Event date: 01/01/1996

Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action at the facility or area referred to CERCLA.
Event date: 08/08/1996

Event: RFI Workplan Approved
Event date: 01/13/1997

Event: CMS Approved
Event date: 01/13/1997

Event: Date For Remedy Selection (CM Imposed)
Event date: 01/13/1997

Event: RFI Approved
Event date: 04/08/1998

Event: Ignation of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.
Event date: 04/08/1998

Event: CA Responsibility Referred To A Non-RCRA Federal Authority
Event date: 04/08/1998

Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1-it appears to be technically infeasible or inappropriate (NF) or 2-there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event date: 04/08/1998

Event: Current Human Exposures under Control, Current human exposures are NOT under control.
Event date: 04/08/1998
USARMY FORT ORD (Continued)

Event date: 05/22/2000
Event: Ignition of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.

Event date: 05/22/2000
Event: Current Human Exposures under Control, Current human exposures are NOT under control.

### US ARMY FORT ORD (Continued)

#### Category Details:
- **NPL Status:** Currently on the Final NPL
- **Category Description:** Depth To Aquifer -> 50 And <= 100 Feet
- **Category Value:** 80
- **NPL Status:** Currently on the Final NPL
- **Category Description:** Distance To Nearest Population -> 0 And <= 1/4 Mile
- **Category Value:** 10

#### Site Details:
- **Site Name:** FORT ORD
- **Site Status:** Final
- **Site Zip:** 93933
- **Site City:** MARINA
- **Site State:** CA
- **Federal Site:** Yes
- **Site County:** MONTEREY
- **EPA Region:** 09
- **Date Proposed:** 07/14/89
- **Date Deleted:** Not reported
- **Date Finalized:** 02/21/90

#### Substance Details:
- **NPL Status:** Currently on the Final NPL
- **Substance ID:** Not reported
- **Substance:** Not reported
- **CAS #:** Not reported
- **Pathway:** Not reported
- **Scoring:** Not reported

- **NPL Status:** Currently on the Final NPL
- **Substance ID:** U210
- **Substance:** TETRACHLOROETHENE
- **CAS #:** 127-18-4
- **Pathway:** GROUND WATER PATHWAY
- **Scoring:** 2

- **NPL Status:** Currently on the Final NPL
- **Substance ID:** U211
- **Substance:** CARBON TETRACHLORIDE
- **CAS #:** 56-23-5
- **Pathway:** GROUND WATER PATHWAY
- **Scoring:** 4

- **NPL Status:** Currently on the Final NPL
- **Substance ID:** U226
- **Substance:** TRICHLOROETHANE, 1,1,1-
- **CAS #:** 71-55-6
- **Pathway:** GROUND WATER PATHWAY
- **Scoring:** 2

- **NPL Status:** Currently on the Final NPL
- **Substance ID:** U228
- **Substance:** TRICHLOROETHYLENE (TCE)
- **CAS #:** 79-01-6
- **Pathway:** GROUND WATER PATHWAY
Conditions at proposal July 14, 1989): Fort Ord covers 46 square miles on Monterey Bay approximately 5.6 miles north of Monterey, Monterey County, California. The installation is bordered by the City of Marina and the Salinas River to the north, El Toro Creek to the east, Seaside and Del Rey Oaks to the south, and Monterey Bay to the west. Fort Ord was established in 1917 as a maneuver area and field artillery target range for units then stationed at the Presidio of Monterey. Its primary mission now is training. Industrial operations at Fort Ord include vehicle maintenance areas, a battery charging/repair facility, photographic processing laboratories, spray painting operations, a plastics shop, laundry/dry cleaning facilities, vehicle wash racks, and a small arms repair shop. Chemicals and hazardous wastes were managed and disposed of at Fort Ord. According to tests conducted by the Army in 1986, elevated levels of contaminants were detected in off-base ground water. The contamination is emanating from the base and may be contaminating the drinking water supplies of the City of Marina; however, the exact location of the source has not yet been identified. The contaminants include carbon tetrachloride, tetrachloroethylene, trichloroethylene, 1,1,1-trichloroethane, and trans-1,2-dichloroethylene. An estimated 38,600 people obtain drinking water from wells within 3 miles of hazardous substances on the fort. Ground water is also used for irrigation. In addition, soil and ground water are contaminated at the Fire Drill Area, where approximately 600 gallons of petroleum products have been spilled. Fort Ord has identified at least 18 other contamination problems. Fort Ord is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. As part of IRP, the Army is implementing a sampling plan to investigate ground water contamination. The Army is treating contaminated soil and ground water at nearby Frit sche Army Airfield Fire Drill Area. Status February 21, 1990): IRP activities continue.
Site Description: The north landfill was used from 1956 to 1966. The main landfill was operated from 1960 until 1987 when disposal was ceased due to interim closure of the facility. During operation of the base, both landfills were used for disposal of residential and commercial waste, including dried sewage sludge, construction debris, and small amounts of chemical waste (such as paint, oil, pesticides, electrical equipment, ink, and epoxy adhesive). Waste received at the landfills was placed in trenches approximately 30 feet wide, 10 to 15 feet apart, and 10 to 12 feet below ground surface. Environmental investigations began at Fort Ord in 1984 under the Regional Water Quality Control Board (RWQCB) cleanup or abatement orders. In 1986, further investigations began at Operable Unit 2 (OU2). In 1990, Fort Ord was placed on the National Priorities List (NPL) because of Volatile Organic Compounds (VOCs) found in ground water beneath OU2. A Federal Facility Agreement (FFA) was signed in 1990 by the Army, U.S. Environmental Protection Agency, the California Environmental Protection Agency's Department of Toxic Substances Control (DSTC) and Regional Water Quality control Board (RWQCB). The FFA established schedules for commencing Remedial Investigations and Feasibility Studies (RI/FS). In 1991, the basewide RI/FS began and Fort Ord was placed on the Base Realignment and Closure list. The final FS for OU2 was completed on October 1, 1993, and the Record of Decision (ROD) was signed in August 1994. An Interim Action Plug-In ROD was signed in March 1994 for excavation and treatment of shallow contaminated soils. The Draft and Draft Final Versions of the Basewide RI/FS were completed in August 1994 and December 1994, respectively. The Former Fort Ord is located near Monterey Bay in northwestern Monterey County, California, approximately 80 miles south of San Francisco. The base comprises approximately 26,000 acres adjacent to the cities of Seaside, Sand City, Monterey, and Del Rey Oaks to the south and Marina to the north. The Southern Pacific Railroad and Highway 1 pass through the western portion of former Fort Ord, separating the beachfront from the rest of the base. Laguna Seca Recreation Area and Toro Regional Park border former Fort Ord to the south and southeast, respectively, as well as several small communities such as Toro.
Park Estates and San Benancio. There are three main developed areas within Fort Ord: the Main Garrison, the East Garrison and Fritzsche Army Airfield (FAAF). The Main Garrison contains commercial, residential, and light industrial facilities. The East Garrison occupies 350 acres on the northeastern edge of the base and consists of military and industrial support areas, recreational facilities, and recreational open space. The FAAF serves as the general airfield for Fort Ord. EPA placed the site on the National Priorities List in 1990. Several areas of contamination exist on site. Generally, chemicals present in soil are the result of former routine maintenance and support activities on Fort Ord. Such activities include: maintenance of military vehicles at wash racks, tank storage of chemicals such as waste oil, the use of oil/water separators in drainage areas, and pesticide use and storage. The facility contained leaking petroleum underground storage tanks, containers of waste oil and various automotive chemicals, chemical storage areas, oil-waste separators, target ranges, and landfills. One on-site area is a 150-acre landfill that was primarily used to dispose of residential waste, as well as small amounts of commercial waste generated by the base. The north landfill covers approximately 30 acres and has residences nearby. Pursuant to a Record of Decision (ROD), this 30 acre portion was clean-closed. The main landfill covers approximately 120 acres that have not been developed. Other areas include a former fire drill area, motor pool maintenance areas, small dump sites, and small arms target ranges. Over 12,000 acres are suspected of containing ordnance and explosives (OE). In particular, the 8,000 acre Multi-Range Area (MRA) is known to contain dangerous unexploded ordnance. OE investigations are complicated by technological limitations and protected habitat that covers the area and requires special management pursuant to the base Habitat Management Plan (HMP). This includes the current requirement to use prescribed burns to clear vegetation prior to OE removal. The HMP currently restricts burns to 800 acres/year, thus requiring at least 10 years to address OE in the MRA. The aquifers at the site are called the upper aquifer and the 180-foot aquifer. Approximately 40,000 people obtain drinking water from wells located within 3 miles of the site. Since opening in 1917, Fort Ord served as a training and staging facility for Army infantry troops. No permanent improvements were made until the late 1930s when administrative buildings, barracks, mess halls, tent pads, and a sewage treatment plant were constructed. The Main Garrison was constructed between 1940 and the 1960s, starting in the northwest corner of the base and expanding southeastward. The FAAF was incorporated into Fort Ord in 1961. Since 1917, portions of the installation were used by infantry units for maneuvers, target ranges, and other purposes. Ordinance and explosives (OE) that have been fired into, fired upon, or used on the facility include artillery and mortar projectiles, rockets and guided missiles, rifle and hand grenades, practice land mines, pyrotechnics, bombs, and demolition materials. A wide variety of conventional OE items have been located at sites throughout the former Fort Ord, including pyrotechnics and explosives. Since the base was selected in 1991 for base realignment and closure (BRAC) and was officially closed in September 1994, site visits, historic and archival investigations, OE sampling, and removal actions have been performed and documented in preparation for transfer and reuse of former Fort Ord property. The Ord Military Community, located within the Main Garrison portion of former Fort Ord, will be retained by the Army. Since base closure in September 1994, lands outside the Ord Military Community have been subjected to the reuse process. Some of the property on the installation has been transferred. A large portion of the Inland Training Ranges was assigned to the Bureau of Land Management (BLM). The other major recipient of Fort Ord property has been the California State University (CSU) system. The CSU Monterey campus is located on the site of the former Fort Ord and is expected to expand in the future. Other areas on the installation have
been or will be transferred to federal, state, local, and private entities through economic development conveyance, public benefit conveyance, negotiated sale, or other means. The reuse of the former Fort Ord following transfer of property increases the possibility of the public being exposed to explosive hazards. In November 1998, the Army agreed to evaluate OE at former Fort Ord in an OE Remedial Investigation/Feasibility Study (RI/FS) consistent with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). A Federal Facility Agreement (FFA) was signed in 1990 by the Army, EPA, and the California Environmental Protection Agency’s Department of Toxic Substances control (DTSC; formerly the Department of Health Services or DHS). The FFA established schedules for performing remedial investigations and feasibility studies and requires that remedial actions be completed as expeditiously as possible. In April 2000, an agreement was signed between the Army, EPA and DTSC to evaluate OE at the former Fort Ord subject to the provisions of the Fort Ord FFA. EPA OU-01: Fritzsche Army Airfield Fire Drill Area An investigation into the nature and extent of contamination in the Fritzsche Army Airfield practice fire area began in 1984. The ROD was signed in September 1995. Groundwater cleanup standards were established in the ROD which must be met through the existing pump and treat system. The selected remedy is consistent with the initial action described above. The groundwater treatment system was installed in 1988. In 2004, the Army awarded a fixed price contract for the management and completion of the groundwater cleanup remedy at Operable Unit 1. EPA OU-02: Fort Ord Landfill One on-site area is a 150-acre landfill that was primarily used to dispose of residential waste, as well as small amounts of commercial waste generated by the base. The north landfill covers approximately 30 acres and has residences nearby. Pursuant to a Record of Decision (ROD), this 30-acre portion was clean-closed. The main landfill covers approximately 120 acres that have not been developed. The north landfill was used from 1956 to 1966. The main landfill was operated from 1960 until 1987 when disposal was ceased due to interim closure of the facility. During operation of the base, both landfills were used for disposal of residential and commercial waste, including dried sewage sludge, construction debris, and small amounts of chemical waste (such as paint, oil, pesticides, electrical equipment, ink, and epoxy adhesive). Waste received at the landfills was placed in trenches approximately 30 feet wide, 10 to 15 feet apart, and 10 to 12 feet below ground surface. In 1994, the Army completed an investigation focusing on groundwater and soil contamination originating from the landfill. A Record of Decision (ROD) was signed in August 1994. The ROD included capping the landfill and installing a groundwater pump and treatment system. Construction of the groundwater treatment system is complete and is operational. In May 1995, the Army proposed to consolidate wastes from several areas around the main landfill which will provide more clean land for re-use. The changes are documented in the Explanation of Significant Differences (ESD) in August 1996. The consolidation is complete and capping of the main landfill was completed in December 2002. The Army has installed an active landfill gas extraction and treatment system to capture and remediate methane and other volatile organic compound gases that are being generated by decaying materials in the landfill. The Army continues to monitor landfill gases to ensure that do not pose a health hazard. EPA OU-03: Overall Site In 1990, the Army began further investigations into the nature and extent of on- and off-site soil and groundwater contamination, as well as any ecological or health threats that may be present. The investigation identified three waste disposal sites, firing ranges, and a vehicle maintenance area that require extensive cleanup actions. The Army completed the RI/FS and ROD in 1997, and all soil cleanup actions are complete, and groundwater pump and treatment systems are operational. The action included remediating the Sites 2/12 maintenance/disposal area by soil excavation and ongoing groundwater remediation, Sites 16/17 disposal area by soil excavation, Site 31 disposal...
## USARMY FORT ORD (Continued)

Area by soil excavation, and Site 39 small arms ranges by soil excavation. Most of the excavated soils were placed at the Fort Ord Landfill, which was closed in December 2002. The Army is currently evaluating treatment/disposal options for additional Site 39 soils to be excavated. Site 39, which includes the Multi-Range Area (MRA), was reportedly used since the early 1900s for small arms training and ordnance training exercises, including onshore naval gunfire. Over the years, in addition to small arms rounds, various types of ordnance have been used or found in the MRA, including hand grenades, mortars, rockets, mines, and artillery rounds. The remedy for Site 39 as described in the Remedial Investigation (RI) Sites Record of Decision (ROD) addresses lead contamination at the Small Arms Ranges, as well as explosive compounds, petroleum hydrocarbons, and other metals associated with training activities. Ordnance is being addressed through other remedial or removal actions. Site 39 comprises approximately 8,500 acres in the southern portion of Fort Ord. Site 39 is bounded by Eucalyptus Road to the north, Barloy Canyon Road to the east, Boundary Road and South Boundary Road to the south, and General Jim Moore Blvd to the west. Results of the RI indicate the metals lead and beryllium, explosive compounds, and organic compounds are present in shallow soil above background concentrations in localized areas at Site 39, and are associated with past military training activities. Spent ammunition found at the Small Arms Ranges consists of bullets, black powder rifle balls, and lead shot. Lead is the primary chemical of concern in soil at the Small Arms Ranges at Site 39. In localized areas, spent ammunition is found on the ground surface. An Explanation of Significant Differences addressing OU 3 was completed in December 2003. EPA OU-04: Surface Soils EPA OU-05: No Action Soils EPA OU-07: Site 3 Beach Range Site 3 is situated within about 3.2 miles (780 acres) of dunes along the coastline of Monterey Bay at the western boundary of Fort Ord. Results of the investigation indicate lead from small arms is the main contaminant at the site. The site is also home of the Smith’s Blue butterfly, an endangered species, and buckwheat plants which the butterflies use to lay their eggs on. In 1997, the Army completed a ROD allowing them to first clean up the lead contamination to address human health concerns by soil excavation and placement in the Fort Ord Landfill, which was simultaneously being remediated (capped). This cleanup was completed in 2000, with the dunes being re-contoured and re-vegetated. The Army is finalizing a post-cleanup ecological risk assessment which suggests the initial cleanup is protective of ecological species as well. EPA OU-08: OE Track 0 (No Further Action) The Track 0 process addresses single or grouped areas of land at the former Fort Ord that have no history of OE-related use and for which No Action is necessary to protect human health and the environment. These areas consist largely of land that has been developed for military support or residential use throughout Fort Ord’s history and areas that have no physical or documented evidence of OE-related training. A Track 0 Special Case area includes a former landfill where OE scrap items were found buried with refuse. No OE-related activities occurred in the area and the OE scrap items and the refuse were entirely removed. Track 0 areas were grouped geographically: e.g., all non-OE land in the Main Garrison was grouped and discussed together as one area. Track 0 includes parcels in the following areas: Highway 1 Area- Golf Course Maintenance Area- Brostrom Park Area- PattonAbrams Park Housing Area- Open Space, Main Entrance Area- Surplus II Area- Fritzsche Army Airfield Area- East Garrison Area- Main Garrison Area- OU 2 Landfill Area- Reservation Road Area Track 0 sites were addressed by a No Further Action Record of Decision (ROD) dated July 2, 2002. The Army has been conducting military munitions sampling and removal actions at identified Munitions Response Sites (MRS) and will continue these actions to mitigate imminent MEC-related hazards to the public while gathering data about the type of military munitions and level of hazard at each of the sites for use in the base-wide MR RI/FS. The Army is performing its activities pursuant to the
President’s authority under the CERCLA Section 104, as delegated to the Army in accordance with Executive Order 12580 and in compliance with the process set out in CERCLA Section 120. Because this is a National Priority List (NPL) site, the Army and EPA jointly select remedial actions including No Action determinations. Therefore, regulatory agencies (EPA and DTSC) have been and will continue to be involved. The Army is preparing the MR RI/FS for Fort Ord to address MEC-related hazards. The MR RI/FS will review and evaluate past investigative and removal actions, as well as recommend future response actions deemed necessary to protect human health and the environment on the basis of proposed reuses specified in the Fort Ord Reuse Authority (FORA) Reuse Plan. The information to be evaluated during the MR RI/FS will include site knowledge, the quality of the available information, work completed, and intended future land uses. The base-wide MR RI/FS will contain a comprehensive evaluation of all MEC-related data for the entire former Fort Ord and will evaluate long-term response alternatives for cleanup and risk management of MEC. The MR RI/FS is organized as a “tracking” process whereby sites with similar characteristics will be grouped to expedite cleanup, reuse, and/or transfer based on current knowledge. The Track 0 Record of Decision (ROD) addresses areas on the former Fort Ord that have been identified as requiring no munitions response to protect human health (public safety) and the environment (Track 0 areas). Other Track (1 through 3) areas will be addressed separately for the other lands that have or are suspected to have a history of military munitions-related use and investigations completed to date. Track 1 sites were suspected to have been used for training with military munitions but for which no further response action is required because they fall into one of the three categories defined in Record of Decision, No Further Action Related to Munitions and Explosives of Concern-Track 1 Sites; No Further Remedial Action with Monitoring for Ecological Risks from Chemical Contamination at Site 3 (MRS-22); Former Fort Ord, California (Track 1 ROD). Track 2 sites are areas at the former Fort Ord where MEC items were present, and MEC removal actions have been completed. Track 3 sites are areas at the former Fort Ord where MEC items are known or suspected to be present, but MEC investigations have not yet been completed. All base-wide MR RI/FS documents have been or will be prepared in cooperation with the EPA and DTSC in accordance with the Fort Ord FFA; made available for public review and comment; and placed in the Administrative Record and local information repositories. A ROD addressing OU 8 was completed in 2002. An Explanation of Significant Difference (ESD) pertaining to the OU8 ROD was completed in April of 2005. EPA OU-09: OE Track 1 sites are sites where munitions and explosives of concern were suspected but no further remedial action was deemed necessary to protect human health and the environment. The Track 1 Proposed Plan was issued for public comment on September 15, 2004 and the ROD is scheduled to be signed in 2005. EPA OU-10: OE at Ranges 43-48, Range 30A, and Site OE-16Ranges 43-48 cover approximately 498 acres to the south of Eucalyptus Road in the south-central portion of the former Fort Ord. The majority of the site is designated as habitat reserve and will remain undeveloped (473 acres), and a limited portion of the site (25 acres) will be developed and reused. These ranges were part of the former Fort Ord’s Multi-Range Area (MRA) and are categorized as firing ranges where personnel were trained in the use of live ammunition. The MRA is fenced and posted with signs warning of the dangers associated with OE. Vegetation at Ranges 43-48 mainly consists of central maritime chaparral (CMC) with some grassland areas. Training facilities maps indicate these ranges were used for a variety of live fire exercises from the 1940s through the 1990s. Records and recent field investigations indicate the ammunition used at these ranges included 4.2-inch, 60mm, and 81mm mortars; 14.5mm subcaliber projectiles; 35mm subcaliber rockets; 90mm recoilless rifle rounds; 84mm high explosive antitank (HEAT) projectiles; 40mm high explosive (HE) grenades; 66mm light antitank weapon (LAW); small

<tr>
<td>arms; practice anti-personnel mines; dragon guided missiles; practice claymore mines; and fragmentation hand grenades. The former firing ranges contain sensitively fuzed, highly dangerous OE present on the ground surface or at shallow depths below the ground. As described above, numerous types of OE ranging from hand grenades to 90mm recoilless rifle rounds are known or suspected to be on the site. During recent limited surface removals in 2001, thousands of OE items were recovered at Ranges 43-48. This Interim Action site is adjacent to (less than 4,000 feet from) residential neighborhoods at Ord Military Community (Fitch and Marshall Parks) and is near the City of Seaside. The Fitch and Martin Luther King Jr. Middle Schools are located less than a mile from Ranges 43-48. Existing site security measures include: four-strand barbed-wire fencing with one to two rolls of concertina wire behind it, chain link gates reinforced with concertina wire, and warning signs posted approximately every 500 feet along the fencing. In the last three years, five documented incidents of persons trespassing into the Ranges 43-48 site occurred. In 1999, there were two documented cases of children entering the fenced MRA at Ranges 44 and 45, and collecting and removing 40mm practice grenades found on the ground surface. Although no one was injured in these incidents, it substantiates the premise that fences posted with warning signs deter, but do not prevent entry. The majority of this Interim Action site is designated as habitat reserve and will remain undeveloped. Future reuse of Transfer Parcel E21b.3 is development. Range 30A includes approximately 388 acres located in the southeastern portion of the MRA, approximately 1,500 feet north of South Boundary Road and to the west of Barloy Canyon Road. The Interim Action site was identified based on the presence of 40mm HE projectiles and is designated as habitat reserve. Range 30A is part of the former Fort Ord MRA and is categorized as a firing range where personnel were trained in the use of live ammunition. The MRA is fenced and posted with signs warning of the dangers associated with OE. Vegetation at Range 30A mainly consists of CMC with some grassland areas. Range 30A was constructed in 1990 as a 40mm machine gun range and was in use until 1993. According to the Fort Ord Training Ranges Standard Operating Procedure (SOP), the only weapon authorized for use at Range 30A from 1991 and 1992 was the MK19 40mm machine gun, Mod 3. Ammunition authorized for use at Range 30A included HE, high explosive dual purpose (HEDP) and target practice (TP). Range 30A is known to contain sensitively fuzed, highly dangerous 40mm grenades and evidence of 60mm and 81mm mortars and 37mm, 75mm, 155mm, and 8-inch projectiles. Limited surface removals in 2001 in the accessible areas of Range 30A have recovered hundreds of whole or partial OE and OE scrap items. The Range 30A Interim Action site is located in close proximity (approximately 2,200 feet north) to the Laguna Seca residential area and Laguna Seca Golf Course, and less than a mile from the Laguna Seca Raceway. South Boundary Road, located approximately 2,000 feet to the south, is open to vehicular traffic during events at Laguna Seca Raceway and is always open to the public for jogging, hiking, and biking. This range was part of the former Fort Ord’s MRA and is categorized as a firing range where personnel were trained in the use of live ammunition. The MRA is fenced and posted with signs warning of the dangers associated with OE. Existing access deterrents include: four-strand barbed-wire fencing with one to two rolls of concertina wire behind it, chain link gates reinforced with concertina wire, and warning signs posted approximately every 500 feet along the fencing. In 2001 alone, two incidents of damaged fencing that may have been caused by trespassers occurred within 2,000 feet of Range 30A (near Range 30), and three other incidents of fence damage were reported within 4,000 feet of the range (near Range 29). Although no one was injured in these incidents, it substantiates the premise that fences posted with warning signs deter, but do not prevent entry. As part of the closure of the former Fort Ord, the MRA will be transferred to the BLM and most of the MRA will remain undeveloped as habitat reserve. The habitat management plan (HMP)</td>
<td></td>
</tr>
</tbody>
</table>
presents the revised boundaries of the habitat reserve areas and describes special land restrictions and habitat management requirements for target species within the reserve areas. Management of the habitat reserve area will fall under the jurisdiction of BLM. Site OE-16 includes approximately 80 acres located immediately north of the former Fort Ord MRA, between Eucalyptus and Parker Flats roads and bounded by Watkins Gate Road to the east (Plate 5). This site will become habitat reserve and will remain undeveloped. The Bureau of Land Management (BLM) land (immediately adjacent) is open to the public for hiking, biking, jogging, and horseback riding. Site OE-16 is surrounded by a temporary 6-foot high chain linked fence. The site is posted with signs warning of the dangers associated with unexploded ordnance. Vegetation at Site OE-16 mainly consists of CMC with some grassland areas. Site OE-16 is a World War II (WWII) era rocket range, and is identified as a “bazooka practice” area on Fort Ord Training Facilities maps dating from 1945 and 1946. Available training maps after 1946 do not identify the bazooka practice area. According to Fort Ord Range Control, this range was probably used as an antitank rocket range during and shortly after WWII. Available information indicates that Site OE-16 had been used for training and live fire exercises from approximately the 1940s until the time the base was officially closed in 1994. Practice and HEAT rockets and rifle grenades were used in the 1940s and possibly the early 1950s. The site was later used for a portion of time as an anti-armor training area. Evidence from the site indicates that both practice and HEAT rounds were used. Site OE-16 contains sensitively fuzed, highly dangerous OE, such as HEAT projectiles, present on the ground surface or at shallow depths below the ground. During recent limited surface removals in 2001, hundreds of OE items, including expended and live 2.36-inch rockets (practice and HEAT), practice antitank mines, rifle grenades, hand grenade fuzes, and OE scrap were recovered. Site OE-16 is located adjacent to the MRA and land that has been transferred to the BLM. The BLM land is open to the public for hiking, biking, jogging, and horseback riding. Site OE-16 is surrounded by a temporary 6-foot high chain linked fence posted with signs warning of the dangers associated with unexploded ordnance. The site is in close proximity to a residential neighborhood (Fitch Park) on the former Fort Ord. In 2001, an incident of persons trespassing within the MRA adjacent to Site OE-16 was reported. In addition, five incidents of trespassing into the MRA adjacent to Site OE-16 occurred within the last three years. Although no one was injured in these incidents, it substantiates the premise that fences posted with warning signs deter, but do not prevent entry. The land that includes Site OE-16 will be transferred to the BLM and will remain undeveloped as habitat reserve. The HMP for former Fort Ord presents the revised boundaries of the habitat reserve areas and describes special land restrictions and habitat management requirements for target species within the reserve areas. Management of the habitat reserve area will fall under the jurisdiction of BLM. An Interim Action Record of Decision addressing OE at EPA OU-10 was signed in September 2002. The first prescribed burn took place on October 24, 2003. The burn escaped the initial boundaries and 1000 acres was burned. The Army is studying the October 2003 burn to understand both what went right and what went wrong. Ordnance has been cleared from the surface of the entire burned area and subsurface clearance is ongoing. The next prescribed burn is scheduled to take place in 2005. OU-10 Track 2 Sites: Track 2 sites are sites where munitions and explosives of concern were found and a removal action was conducted to clean it up. The first of several Track 2 RI/FS reports is due to be issued in 2005 for the area of Fort Ord known as Parker Flats. EPA OU-11: OE Track 3 Sites: Track 3 sites are sites where munitions and explosives of concern are known to be present but no cleanup has been conducted yet. The final Track 3 ROD is expected to be completed by 2007, with UXO cleanup work continuing for at least 10 years thereafter. EPA OU-12: Carbon Tetrachloride Plume: The Army has initiated a
remedial investigation/feasibility study of another area of groundwater contamination, the so-called "carbon tetrachloride plume operable unit", near the City of Marina. Contaminants slightly above regulatory standards have been found in offsite groundwater. This area of contamination is not being used for drinking water. Potential source areas are also being investigated. A soil vapor sampling and extraction system pilot study was conducted in 2004 to address the vadose zone above the carbon tetrachloride plume area. The pilot study was very successful and appears to have removed significant mass from the vadose zone. The Army expects to complete the draft Remedial Investigation/Feasibility Study Report for the carbon tetrachloride plume operable unit in 2005.OU 9. A list of the 21 Track 1 sites for which No Further Action Related to MEC is required is comprised of:

**MRS-1-Flame Thrower Range:**
The site is 25 acres in size, and is located in the northwestern part of former Fort Ord. MRS-1 is currently occupied by housing. Proposed reuse plans include residential development. Based on the literature review and sampling, the site appears to have been used for camouflage training, mine and booby trap training, non-firing mortar training, and flame thrower training. Most of this area has been used for military housing for over 40 years.

**MRS-6-Mine and Booby Trap Training Area:** The site is 2 acres in size, and is located in the northwest portion of former Fort Ord near residential housing. The site is currently undeveloped with proposed reuse plans to include development with reserve areas or development with restrictions. Review of training maps, aerial photographs, and other Fort Ord maps indicate mine and booby trap training occurred at the site. The adjacent areas have been used as a school and military housing for over 40 years.

**MRS-13A-Practice Mortar Range:** The site is 61 acres in size, and is located in the northern portion of the former Fort Ord. Proposed reuse plans for MRS-13A include residential development and a park. The majority of the site has contained residential housing for nearly 30 years. The area was extensively graded in the 1970s and housing was built on portions of the site. The western portion of the site was used as a landfill in the 1960s. All landfill material in the western portion of MRS-13A was excavated (removed) and transported to the main landfill south of Immix Road in the 1990s. Several munitions debris items and three unexploded ordnance (UXO) items were identified within and adjacent to MRS-13A during landfill excavation and housing development grading activities and were removed: three live ground signals and loose pyrotechnic material; three inert hand grenade primer detonators; two inert 40mm signal cartridges; an inert fin assembly for a 3.5-inch rocket; a live rifle grenade; miscellaneous projectiles; and two inert 3.5-inch rocket motors.

**MRS-20-Recoilless Rifle Training Range:** The site is 7 acres in size, and is located in the southwestern portion of the Main Garrison near residential housing and Highway 1. This site is currently open space with proposed reuse plans, which include development. The site was identified as a potential Recoilless Rifle Training Range and was reportedly used for various training activities including recoilless rifle, machine gun, and other unknown types of training. Recoilless rifles are portable antitank weapons that were either shoulder- or ground-fired, and in some cases, could be fired by either method.

**MRS-22 (Site 3)-Beach Trainfire Ranges:** The site is 952 acres in size, and is located on the Monterey Bay coastline along the western margin of former Fort Ord as shown on Plate 2. The site is currently open space with the proposed reuse of the site to include a State park with open space and recreational areas. Training maps, aerial photographs, and interviews indicate the site was used as the Beach Trainfire Ranges from 1940s until base closure in 1994. The ranges contained 17 small arms firing ranges; an obstacle course; a bivouac area; a rifle instruction circle; a bayonet assault course; chemical, biological, and radiological (CBR) training areas; target detection training areas; an infiltration course; and a former ammunition supply point. CBR training at MRS-22 (Site 3) only involved training troops in the identification...
of targets while wearing gas masks, and did not involve the use of chemical, biological or radiological materials. Training at the Beach Trainfire Ranges reportedly also included occasional practice mortar use with inert training devices, amphibious assault landings, and battle demonstrations. MRS-24B-Practice Hand Grenade Range: The site is 14.2 acres in size, and is located in the west-central portion of former Fort Ord that contains military residential housing. The site is also located south of the Main Garrison and just north of the Impact Area. MRS-24B will continue to be used for military housing. Historical and sampling information indicate the site was used as practice hand grenade range in the 1940s. MRS-24D-Booby Traps: The site is 1.8 acres in size, and is located in the west central portion of former Fort Ord that contains military residential housing. The site is also located south of the Main Garrison and just north of the former Impact Area. MRS-24D will continue to be used for military housing. The site was identified as a "Booby Traps" and squad patrol training area based on review of a 1946 historical map; however, the site boundary was northwest of the area shown as "Booby Traps" on 1945 and 1946 training maps. MRS-24E-Practice Rifle Grenade Range: The site is 2.7 acres in size, and is located in the west central portion of former Fort Ord. The site is also located south of the Main Garrison and just north of the former Impact Area within a military housing complex. MRS-24E will continue to be used for military housing. MRS-24E was identified as a Practice Rifle Grenade Range on 1945/1946 training maps, but no evidence of this use was discovered during sampling at the site. MRS-27X-Training Site 24: The site is 79.5 acres in size, and is undeveloped open space located in the southeastern portion of former Fort Ord. MRS-27X is currently a habitat reserve area managed by the Bureau of Land Management (BLM), and is open to the public for recreational use. Based on review of Fort Ord training maps, the site was used as a troop training and maneuver area from the 1950s to 1970s, and as an overnight bivouac area and medical training area in the 1980s. MRS-27Y-Training Site 25: The site is 25 acres in size, and is mainly undeveloped open space located in the eastern portion of former Fort Ord along Inter-Garrison Road. A small portion of the site also lies on property that was transferred to California State University Monterey Bay in 1995 for development. The site was identified as one of 26 training sites within Fort Ord Training and Maneuver Areas used as troop training, maneuver, and overnight bivouac areas. MRS-32A-Oil Well Road Training Area: The site is 38 acres in size, and is located in the southeastern portion of former Fort Ord, surrounded by undeveloped open space. Proposed reuse plans for MRS-32A include maintaining the land as habitat reserve. Based on training maps and interviews, the site may have been used as a tank gunnery range in 1950s, for training with shoulder-launched projectiles in 1950s and 1960s, and as a troop training and maneuver area from 1950s to 1980s. MRS-32B-Oil Well Road Training Area II: The site is 47 acres in size, and is located in the southeastern portion of former Fort Ord, surrounded by undeveloped open space. Proposed reuse plans for MRS-32B include maintaining the land as habitat reserve. Based on historical training maps (circa 1954 and 1956), it was identified as the "Oil Well Road Training Area"; a portion of the site was reportedly used as a Tank Gunnery Range in 1950s; and the site may also have been used for firing of shoulder-launched projectiles. MRS-39-Mine and Booby Trap Area: The site is 12.1 acres in size, and is located east of General Jim Moore Boulevard and south of Gigiling Road in the Marshall Park housing area. MRS-39 will continue to be used for military housing. The site was identified as a Mine and Booby Trap Training Area on 1957/1958 maps. MRS-49-Former Rifle Grenade Range: The site is 28 acres in size, and is located in the west central portion of former Fort Ord, south of Main Garrison and just north of military housing. The site is currently undeveloped and proposed reuse plans include development. The site was identified as a training area and rifle grenade range in the 1940s and 1950s.

**USARMY FORT ORD (Continued)**

Based on interviews conducted during the Preliminary Assessment/Site Inspection (PA/SI) phase of the Fort Ord Archive Search. MRS-59A-Unnamed: The site is 41 acres in size, and is located in the eastern portion of former Fort Ord near the East Garrison and MRS-5. The site is currently undeveloped and proposed reuse plans include development. The site was identified as a possible 2.36-inch rocket range during interviews conducted during the PA/SI phase of the Fort Ord Archive Search. The site appears to have been used for or/been within the downrange area of small arms ranges from the 1930s until base closure in 1994. No training areas where military munitions would be used were identified on historical training maps. MRS-62-Laguna Seca Open Space: The site is 247 acres in size, and is located at the southern end of former Fort Ord. The site is currently open space and proposed reuse plans include development. The site was identified as a small arms and flare training area during an interview with a former Fort Ord Fire Chief conducted during the PA/SI phase of Fort Ord Archive Search. Based on review of training maps, aerial photographs, and site reconnaissance, the site was used as a troop training and maneuver area from the late 1940s through 1980s; and the southern half of the site was included in a “Noise Buffer Zone” from 1978 to 1987, where no firing of ammunition was allowed, including pyrotechnics, explosives, or simulators. MRS-62 lies within a larger area identified during interviews conducted as part of the Archives Search as “Area T” and was described as a general area where training may have occurred. The boundary of MRS-62 is based on transfer parcel delineation and not on evidence of munitions use. The boundary of MRS-62 was established to correspond to with disposal Parcel L20.6. Although the size of the parcel to be transferred has changed over time, the boundary of MRS-62 corresponds with the current boundary of Parcel L20.6. MRS-63-Canyon Training Area: The site is 28 acres in size, and is located at the southern end of former Fort Ord east of MRS-62. MRS-63 is currently a habitat reserve area managed by the BLM, and is open to the public for recreational use. The site was identified as a small arms and flare training area during the PA/SI phase of the Fort Ord Archive Search. Based on review of training maps, aerial photographs, and site reconnaissance, most of the site was included in a “Noise Buffer Zone” from 1978 to 1987, where no firing of ammunition was allowed, including pyrotechnics, explosives, or simulators. MRS-66-Signal Corps Small Arms: The site is 41 acres in size, and is located in the northeastern portion of former Fort Ord Plate 2. The majority of the site lies on property transferred to California State University Monterey Bay (CSUMB) that is currently used for student housing or is proposed for development. A small portion of the site lies on property that is designated as habitat reserve. The site was identified as a reported signal corps field training area during the PA/SI phase of Fort Ord Archive Search, and other uses included aviation training, basic unit training, and a bivouac area from 1950s until housing construction in 1989. MRS-69-Unnamed: The site is 37 acres in size, and is undeveloped open space located on the eastern side of former Fort Ord. MRS-69 is currently a habitat reserve area managed by the BLM, and is open to the public for recreational use. The site was identified as an area of possible rifle grenade use based on interviews with a former Fort Ord Fire Chief. This site is within land transferred to the BLM and is open to the public for hiking, biking, and horseback riding. Use is limited to marked trails. The public has had access to this area for approximately 6 years. MRS-70-Unnamed: The site is 14 acres in size, and is located on the southeastern side of former Fort Ord, south of Oil Well Road. The site is currently a habitat reserve area managed by BLM, and is open to the public for recreational use. The area encompassing MRS-70 was identified as containing firing berms based on interviews with a former Fort Ord Fire Chief. A ROD addressing OU 9 was completed in April 2005. Operable Unit 2: The Fort Ord Landfills area was designated as Operable Unit 2 (OU2) when a remedial investigation identified
the presence of volatile organic compounds (VOCs) associated with landfill materials in groundwater beneath the site. Based on frequency of detection and measured concentrations, trichloroethene (TCE) was the most significant groundwater contaminant detected during the remedial investigation. Remedial actions have been implemented to address contaminated groundwater and ongoing remediation of groundwater associated with OU2 is being conducted in accordance with the OU2 Record of Decision (ROD) and the Explanation of Significant Differences, Operable Unit 2, Fort Ord Landfills (OU2 ESD). In accordance with the OU2 ROD and the Explanation of Significant Differences, Area A, Operable Unit 2, Fort Ord Landfills, the Army completed removal and consolidation of refuse from the north landfill into the main landfill in October 1998 and installation of an engineered cover system for the main landfill in December 2002 as part of the closure process for the Fort Ord Landfills. At the Fort Ord Landfills, the perimeter fence line was initially designated as the boundary for landfill gas (LFG) compliance monitoring in accordance with applicable or relevant and appropriate requirements (ARARS) and LFG monitoring probes were installed inside the fence line. Monitoring of these probes commenced in June 2000. Fixed-based laboratory results and field measurements showed methane concentration exceeding the 5% regulatory standard in most probes. The Army performed an additional investigation in August 2000 and sampling results showed that methane was detectable extending out about 70 feet front the fence line on the east side of Area F. All probes were monitored again in September and December 2000, with the results again showing methane concentrations exceeding the 5% standard. In response the Army installed additional probes at locations around the outer parts of the OU2 property beyond the fence line in April and May 2001. Analytical results for these probes indicated that methane concentrations at the property boundary were less than the 5% standard, with the exception of the east side of Area F. The Army also performed ambient air monitoring in October 2000, November 2000, September 2001 and September 2002 to determine landfill gas dispersion in ambient air on the east side of Area F.

The Army determined the data evaluated in the HHRA were limited and additional monitoring would be appropriate. Additional ambient air monitoring was conducted on a quarterly basis in 2003 and the HHRA updated to include these data and evaluate specifically landfill-related risk. The updated HHRA indicated the Fort Ord Landfills are not a significant contributor of VOCs in ambient air or risk to downwind receptors. The following remedies for the Fort Ord Landfills were selected in the OU2 ROD:

- A cover system to (1) prevent rainwater from percolating through the landfilled areas into the underlying aquifers; (2) collect and remove methane offgas (if necessary); and (3) prevent exposure of sanitary waste in the landfills to the surrounding environment.
- Institutional controls (i.e., deed restrictions) to be placed on the property to ensure that the integrity of the cover system is maintained and prevent potential direct exposures of VOCs to the environment or people associated with future use of the site.
- Institutional controls (i.e., deed restrictions) that prevent the use of groundwater within the contaminant plume.
- Groundwater extraction and treatment, to be monitored on a regular basis and adjusted as warranted by the performance data collected during operation. Additionally, treated groundwater will be discharged to the A-aquifer and Upper 180-foot aquifer by means of recharge systems or reused at the surface. Three previous ESDs to the OU2 ROD have been completed: Explanation of Significant Differences, Operable Unit 2, Fort Ord Landfills (OU2 ESD).
US ARMY FORT ORD (Continued)

OU2 ESD finalized the cleanup standard for the Upper 180-foot Aquifer to be consistent with those of the A-aquifer to facilitate the coordinated cleanup strategy for both aquifers. - Explanation of Significant Differences, Area A, Operable Unit 2, Fort Ord Landfills (Area A ESD). The Area A ESD addressed excavation and consolidation of refuse from the north landfill (Area A) into the main landfill (Areas B through F). - Explanation of Significant Differences, Consolidation of Remediation Waste in a Corrective Action Management Unit, Operable Unit 2, Fort Ord Landfills (CAMU ESD). The CAMU ESD addressed using remediation waste as foundation layer material instead of “clean” (uncontaminated) soil as described in the OU2 ROD. An additional ESD addressing OU2 was completed in October of 2006. The Former Fort Ord is located near Monterey Bay in northwestern Monterey County, California, approximately 80 miles south of San Francisco. The base comprises approximately 28,000 acres adjacent to the cities of Seaside, Sand City, Monterey, and Del Oro Decision (ROD), this 30 acre portion was clean-closed. The main landfill covers approximately 120 acres that have not been developed. Other areas include a former fire drill area, motor pool maintenance areas, small dump sites, and small arms tarsives. Since the base was selected in 1991 for base realignment and closure (BRAC) and was officially closed in September 1994, site visits, historic and archival investigations, OE sampling, and removal actions have been performed and documented in former Fort Ord subject to the provisions of the Fort Ord FFA. EPA OU-01: Fritzsche Army Airfield Fire Drill Area An investigation into the nature and extent of contamination in the Fritzsche Army Airfield practice fire area began in 1984. The ROD water treatment system is complete and is operational. In May 1995, the Army proposed to consolidate wastes from several areas around the main landfill which will provide more clean land for re-use. The changes are documented in the Explanation of Significant Differences, mortars, rockets, mines, and artillery rounds. The remedy for Site 39 as described in the Remedial Investigation (RI) Sites Record of Decision (ROD) addresses lead contamination at the Small Arms Ranges, as well as explosive compounds, in 2000, with the dunes being re-contoured and re-vegetated. The Army is finalizing a post-cleanup ecological risk assessment which suggests the initial cleanup is protective of ecological species as well. EPA OU-08: OE Track 0 (No Further Action) the process set out in CERCLA Section 120. Because this is a National Priority List (NPL) site, the Army and EPA jointly select remedial actions including No Action determinations. Therefore, regulatory agencies (EPA and DTSC) have been and will continue 3 (MRS-22); Former Fort Ord, California (Track 1 ROD). Track 2 sites are areas at the former Fort Ord where MEC items were present, and MEC removal actions have been completed. Track 3 sites are areas at the former Fort Ord where MEC items are known at these ranges included 4.2-inch, 60mm, and 81mm mortars; 14.5mm subcaliber projectiles; 35mm subcaliber rockets; 90mm recoilless rifle rounds; 84mm high explosive antitank (HEAT) projectiles; 40mm high explosive (HE) grenades; 66mm light antitank, approximately 1,500 feet north of South Boundary Road and to the west of Barley Canyon Road. The Interim Action site was identified based on the presence of 40mm HE projectiles and is designated as habitat reserve. Range 30A is part of the former forced with concertina wire, and warning signs posted approximately every 500 feet along the fencing. In 2001 alone, two incidents of damaged fencing that may have been caused by trespassers occurred within 2,000 feet of Range 30A (near Range 30), an OE-16 had been used for training and live fire exercises from approximately the 1940s until the time the base was officially closed in 1994. Practice and HEAT rockets and rifle grenades were used in the 1940s and possibly the early 1950s. The site of Decision addressing OE at EPA OU-10 was signed in September 2002. Operable Unit 10: MRS-3 Based on the MRS-3 sampling results, a MEC removal to four feet bgs was recommended per the Final Phase I Engineering Evaluation/Cost Analysis (Phase I E MEC items were removed. In addition, 293 items were removed, inspected and determined not to
have been used as a tank gunnery range in 1950s, for training with land as habitat reserve. Based on training maps and interviews, the site may training area based on revised reuse plans for MRS-32A include maintaining the military housing. The site was identified as a Booby Traps and squad patrol just north of the former Impact Area. MRS-24D will continue to be used for residential housing. The site is also located south of the Main Garrison and Portable antitank weapons that were either shoulder- or ground-fired, and in machine gun, and other unknown types of training. Recoilless rifles are reportedly used for various training activities including recoilless rifle, portion of former Fort Ord near residential housing. Training Range and was Training Area: The site is 2 acres in size, and is located in the northwest pose an explosive hazard; these items were classified as MD and were disposed or recycled. Most of the items found at MRS-4B were consistent with the report MRS-13B at depths ranging from a few to 48 inches bgs. The DMM and MD recovered from burial pits included grenade and mine fuzes, firing devices, pyrotechnics (signal, illumination and smoke), rockets, rifle and hand smoke grenades, blasting caps, items found within MRS-27G were generally of the types associated with overnight bivouac training sites and general maneuver areas. Within MRS-27G’s boundaries a small number of 75 millimeter (mm) and 37mm items were removed, inspected and determined removal to four feet bgs. This MRS was subsequently subdivided into 240 100- X 100-foot removal grids. An investigation for MEC was conducted using the Schonstedt Model GA-52/Cx magnetometer, with all detected MEC removed. 50 MEC items were removed. Here removed. In addition, 149 pounds of debris was removed, inspected and determined not to pose an explosive hazard; these items were classified as MD and were disposed or recycled. Of the 26 MEC items recovered, 2 munitions (a MK I 75mm Shrapnel prtems were non-penetrating (e.g., pyrotechnics, grenades, and grenade and projectile fuzes) munitions. The penetrating military munitions found included projectiles, rifle grenades, and rockets. Both DMM and MD were found in numerous burial pits that rated all detected anomalies at 52 100- X 100-foot grids using a Schonstedt Model GA-52/Cx magnetometer. During this investigation, 19 MEC items were removed. In addition, 453 pounds of debris was removed, inspected and determined not to pose an explosive pits were discovered during the removal conducted at MRS-53. Both DMM and MD were found in burial pits at depths ranging from a few to 48 inches bgs. The DMM and MD recovered from these pits included fuzes (grenade, mine, time, and projectile), sich 1998, 23 100- X 200-foot grids were identified at MRS-55. Subsequently, 19 of these grids were surveyed using a Schonstedt Model GA-52/Cx magnetometer with a maximum search lane width of 5 feet. Following the survey, anomalies were selected for in). Other sources of future land use information include public benefit conveyance, negotiated sale requests, transfer documents, and the Installation-Wide Multispecies Habitat Management Plan for Former Fort Ord, California. The Reuse Plan identified ground disturbing activities (e.g., during construction/excavation). A ROD addressing Operable Unit 10 was completed in August 2008. The first prescribed burn took place on October 24, 2003. The burn escaped the initial boundaries and 1000 acres/Action in the Record of Decision, Interim Action for Ordnance and Explosives at Ranges 43-48, Range 30.A, and Site OE-16, Former Fort Ord, California (Interim Action ROD; Army, 2002), and the implementation of MEC remediation under the Interim Action tetrachloride (CT) detected in three different aquifers up to 550 feet below ground surface (bgs). No records exist to indicate exactly when, how often, or how much CT may have been used, stored, or disposed of; however, by delineating the areas od by the Marina Coast Water District (MCWD) and is pumped from wells that are located east of the OUCTP area screened in the Lower 180-Foot Aquifer. Based on groundwater monitoring data and data provided by the MCWD, these drinking water wells have no flame thrower training. Most of this area has been used for military housing for over 40 years. MRS-6-Mine and Booby Trap Training Area: The site is 2 acres in size, and is located in the northwest portion of former Fort Ord near residential housing. Training Range and was reportedly used for various training activities including recoilless rifle, machine gun, and other unknown types of training. Recoilless rifles are portable antitank weapons that were either shoulder- or ground-fired, and in residential housing. The site is also located south of the Main Garrison and just north of the former Impact Area. MRS-24D will continue to be used for military housing. The site was identified as a Booby Traps and squad patrol training area based on revised reuse plans for MRS-32A include maintaining the land as habitat reserve. Based on training maps and interviews, the site may have been used as a tank gunnery range in 1950s, for training with
**USARMY FORT ORD** (Continued)

shoulder-launched projectiles in 1950s and 1960s, and a. The site appears to have been used for/or been within the downrange area of small arms ranges from the 1930s until base closure in 1994. No training areas where military munitions would be used were identified on historical training maps. MRS-62-L78 to 1987, where no firing of ammunition was allowed, including pyrotechnics, explosives, or simulators. MRS-66-Signal Corps Small Arms: The site is 41 acres in size, and is located in the northeastern portion of former Fort Ord Plate 2. The major site. Based on frequency of detection and measured concentrations, trichloroethene (TCE) was the most significant groundwater contaminant detected during the remedial investigation. Remedial actions have been implemented to address contaminated ground of Area F. The Army also performed ambient air monitoring in October 2000, November 2000, September 2001 and September 2002 to determine landfill gas dispersion in ambient air on the east side of Area F. The results showed trace concentrations of volatil groundwater will be discharged to the A-aquifer and Upper 180-foot aquifer by means of recharge systems or reused at the surface. Three previous ESDs to the OU2 ROD have been completed: - Explanation of Significant Differences, Operable Unit 2, Fort O

**ROD:**

Full-text of USEPA Record of Decision(s) is available from EDR.

**FINDS:**

Registry ID: 110000874929

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
USARMY FORT ORD (Continued)

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

**NPL:** National Priority List
- National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

| Date of Government Version: 11/01/2009 | Source: EPA |
| Date Data Arrived at EDR: 11/13/2009 | Telephone: N/A |
| Date Made Active in Reports: 01/11/2010 | Last EDR Contact: 01/14/2010 |
| Number of Days to Update: 59 | Next Scheduled EDR Contact: 04/26/2010 |

NPL Site Boundaries

**Sources:**
- EPA’s Environmental Photographic Interpretation Center (EPIC)
  - Telephone: 202-564-7333
- EPA Region 1
  - Telephone: 617-918-1143
- EPA Region 3
  - Telephone: 215-814-5418

  - Telephone: 404-562-8033
- EPA Region 5
  - Telephone: 312-886-6686
- EPA Region 10
  - Telephone: 206-553-8665

**Proposed NPL:** Proposed National Priority List Sites
- A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| Date of Government Version: 11/01/2009 | Source: EPA |
| Date Data Arrived at EDR: 11/13/2009 | Telephone: N/A |
| Date Made Active in Reports: 01/11/2010 | Last EDR Contact: 01/14/2010 |
| Number of Days to Update: 59 | Next Scheduled EDR Contact: 04/26/2010 |

**NPL LIENS:** Federal Superfund Liens
- Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: Quarterly
Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 11/01/2009

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009
Date Data Arrived at EDR: 08/11/2009

Next Scheduled EDR Contact: 04/26/2010
Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009
Date Data Arrived at EDR: 09/02/2009

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2009
Date Data Arrived at EDR: 12/17/2009
Date Made Active in Reports: 01/11/2010
Number of Days to Update: 25

Telephone: (415) 495-8895
Last EDR Contact: 01/15/2010
Next Scheduled EDR Contact: 04/19/2010
Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2009
Date Data Arrived at EDR: 12/17/2009

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

TC2696391.2s  Page GR-3
US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
Date of Government Version: 10/01/2009
Date Data Arrived at EDR: 10/09/2009
Date Made Active in Reports: 11/09/2009
Number of Days to Update: 31

Telephone: 703-603-0695
Next Scheduled EDR Contact: 03/29/2010
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.
Date of Government Version: 10/01/2009

State-and-tribal-equivalent CERCLIS
ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
### State and tribal landfill and/or solid waste disposal site lists

**SWF/LF (SWIS):** Solid Waste Information System
Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments—EPA’s Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA’s Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients—States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 10/01/2009

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/01/2009
Date Data Arrived at EDR: 06/22/2009
Date Made Active in Reports: 09/21/2009
Number of Days to Update: 91
Source: Drug Enforcement Administration

Next Scheduled EDR Contact: 03/22/2010
Data Release Frequency: Quarterly

HIST CAL-SITES: Calsites Database
The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.
### SCH: School Property Evaluation Program
This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills
shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from
the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings
were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System
RCRA Administrative Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

- **Date of Government Version:** 04/17/1995
- **Source:** EPA
- **Date Data Arrived at EDR:** 07/03/1995

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2008

MWMP: Medical Waste Management Program Listing
The Medical Waste Management Program (MWMP) ensures the proper handling and disposal of medical waste by permitting and inspecting medical waste Offsite Treatment Facilities (PDF) and Transfer Stations (PDF) throughout the state. MWMP also oversees all Medical Waste Transporters.
FEDLAND: Federal and Indian Lands

EDR PROPRIETARY RECORDS

EDR Proprietary Records
Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

COUNTY RECORDS

ALAMEDA COUNTY:
Contaminated Sites
A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Underground Tanks
Underground storage tank sites located in Alameda county.

CONTRA COSTA COUNTY:
Site List
List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

SAN DIEGO COUNTY:
Hazardous Materials Management Division Database
The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)
### Solid Waste Facilities

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 12/31/2007  Source: Department of Environmental Protection
Date Data Arrived at EDR: 08/26/2009  Telephone: 860-424-3375
Date Made Active in Reports: 09/11/2009  Last EDR Contact: 11/24/2009
Number of Days to Update: 16  Next Scheduled EDR Contact: 03/08/2010
Data Release Frequency: Annually

NJ MANIFEST: Manifest Information
Hazardous waste manifest information.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools  
Source: National Center for Education Statistics  
Telephone: 202-502-7300  
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities  
Source: Department of Social Services  
Telephone: 916-657-4041

Flood Zone Data:  This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI:  National Wetlands Inventory.  This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)  
Source: United States Geologic Survey  
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

STREET AND ADDRESS INFORMATION

Groundwater flow velocity is generally impacted by the nature of the geologic strata. Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE
Target Property County: MONTEREY, CA
Flood Plain Panel at Target Property: 06053C - FEMA DFIRM Flood data
Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY
NWI Quad at Target Property: YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:
Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®
Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Baywood
Soil Surface Texture: sand
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class: Somewhat excessively drained
Hydric Status: Not hydric
Corrosion Potential - Uncoated Steel: High
Depth to Bedrock Min: > 0 inches
Depth to Watertable Min: > 0 inches

Water System Information:

Prime Station Code: 13S/03E-17Q05 M  User ID: 27C
FRDS Number: 2700649001  County: Monterey
District Number: 57  Station Type: WELL/AMBNT/MUN/INTAKE
Water Type: Well/Groundwater  Well Status: Active Raw
Source Lat/Long: 363933.5 1214753.4  Precision: 1,000 Feet (10 Seconds)
Source Name: WELL 01
System Number: 2700649
System Name: ESSICK ROAD WATER SYSTEM #1
Organization That Operates System: Not Reported
Pop Served: Unknown, Small System  Connections: Unknown, Small System
Area Served: Not Reported
Sample Collected: 07/27/2004  Findings: 38 MG/L
Chemical: NITRATE (AS NO3)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW R Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
OTHER

Airport Landing Facilities: Private and public use landing facilities
    Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
    Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
